Totalitarianism and Political Religions, Volume II Hans Maier, Michael Schäfer, 2007-12-24 Available for the first time in English language translation this is the long awaited second volume of the three part set on Totalitarianism and Political Religions edited by the eminent Professor Hans Maier This represents a major study with contributions from leading scholars of political extremism sociology and modern history the book shows how new models for understanding political history arose from the experience of modern despotic regimes We are used to distinguishing the despotic regimes of the twentieth century Communism Fascism National Socialism Maoism very precisely according to place and time origins and influences But what should we call that which they have in common On this question there has been and still is a passionate debate Indeed the question seemed for a long time not even to be admissible Clearly this state of affairs is unsatisfactory The debate has been renewed in the past few years After the collapse of the communist systems in Central East and Southern Europe a scarcely surveyable mass of archival material has become available Following the lead of Fascism and National Socialism communist and socialist regimes throughout the world now belong to the historical past as well This leads to the resumption of old questions what place do modern despotisms assume in the history of the twentieth century What is their relation to one another Should they be captured using traditional concepts autocracy tyranny despotism dictatorship or are new concepts required Here the most important concepts totalitarianism and political religions are discussed and tested in terms of their usefulness This set of volumes is as topical and relevant to current world events in the twenty first century **General**

Catalogue of Printed Books British Museum. Department of Printed Books, 1968 **Theories of Imperialism** Wolfgang J. Mommsen, 1982-03-15 In recent years the discussion of imperialism has become so compartmentalized that it is difficult for somebody who is not directly involved to put the often polemical discussion and the various scientific and political positions forward into a relevant context Mommsen's survey is an excellent guide German Studies on the German edition Theories of Imperialism is the most succinct fairest and most sophisticated statement I have seen of the range of theories of imperialism Each set of theorists is come at in their own terms described fairly and summarized fully The book is objective readable and short Robin W Winks Yale University *The Thought of Mao Tse-tung* United States. Department of State. External Research Division, 1962 *Cult & Canon* Helmut Martin, 1982 The 18th century Chinese poet Yuan Mei also wrote some short fiction Censored by Confucius which is reproduced here The stories offer insights into Mei's views on crime sex the status of women homosexuality miscarriage of justice ghosts revenge and conservative morality *Handbook on Communism* Joseph M. Y. Shaw, 2017-02-22 Carl Schmitt and Leo Strauss in the Chinese Speaking World Reorienting the Political examines the reception of Carl Schmitt and Leo Strauss in China and Taiwan The legacies of both Schmitt the German legal theorist and

thinker who joined the Nazi party and Strauss the German Jewish classicist and political philosopher who became famous after his emigration to the United States are highly controversial Since the 1990s however these thinkers have had a powerful resonance for Chinese scholars Today when Chinese intellectuals debate the Chinese state the future role of China in the world the liberal international order and even the meaning of Confucian civilization they often employ Schmittian and Straussian concepts like the political friend enemy state of exception liberal education and natural right The very possibility of a genuine Chinese political theory is often thought to be tied to the legacy of these two thinkers This volume explores this complex phenomenon with a cross cultural and interdisciplinary approach The twelve essays in this volume are written from a range of perspectives by philosophers political theorists historians and legal scholars from China Germany Taiwan and the United States

Development in Theory and Practice Ronald H. Chilcote, 2003 This definitive reader brings together seminal articles on development in Latin America Tracing the concepts and major debates surrounding the issue the text focuses on development theory through three contrasting historical perspectives imperialism underdevelopment and dependency and globalization By offering a rich array of essays from Latin American Perspectives the book allows students to sample all the important trends in the field A new general introduction and conclusion along with part introductions contextualize each selection One of the leading figures in development studies Ronald Chilcote shows in this text why work on imperialism dating to the turn of the twentieth century informs the controversies on dependency and underdevelopment during the 1960s and 1970s as well as the globalization debates of the past decade If students are to understand development in Latin America they must not only be familiar with historical examples and recognize that various theoretical perspectives affect our interpretation of events they must be willing to keep an open mind Thus rather than setting out established premises this reader offers different points of view raising provocative questions about Latin America that remain largely unanswered even today Students will come away from this rewarding collection ready to pursue new understanding through critical inquiry and thinking

Author Bibliography: L-R Association for Asian Studies, 1970 War, Peace and the Military Franz Kernic, 2023-03-17 This book is a comprehensive analysis of the various social science approaches to explaining and interpreting war peace and the military Its central aim is to trace and reconstruct those basic assumptions constructed and thought processes undertaken by modern social sciences in their research and conceptualization of military violence and the use of force In addition to such reconstruction the aim is also to enquire into the preconditions of such thought This study therefore eschews the development of an explicit strategy in the sense of a research strategy but instead is much more concerned with thinking

about its subject matter by means of re thinking and reflecting upon different theoretical approaches and problems The investigation includes a critical reexamination of the tradition of military sociological research from the beginning of modern sociology to late twentieth century theoretical approaches regarding the security focused and or war driven aspects of modern society Maos Dialektik des Widerspruchs Tien-mu Cheng,1971 **The Science of Society** G.
