Moving Water Amy Green, 2021-03-02 A riveting story of environmental disaster and political intrigue *Moving Water* exposes how Florida's clean water is threatened by dirty power players and the sugar cane industry Only a century ago nearly all of South Florida was under water The Everglades one of the largest wetlands in the world was a watery arc extending over 3 million acres Today that wetland ecosystem is half of its former self supplanted by housing for the region's exploding population and over 700 000 acres of crops including the nation's largest supply of sugar cane Countless canals dams and pump stations keep the trickle flowing but rarely address the cascade of environmental consequences including dangerous threats to a crucial drinking water source for a full third of Florida's residents In *Moving Water* environmental journalist Amy Green explores the story of unlikely conservation heroes George and Mary Barley wealthy real estate developers and champions of the Everglades whose complicated legacy spans from fisheries in Florida Bay to the political worlds of Tallahassee and Washington At the center of their surprising saga is the establishment and evolution of the Comprehensive Everglades Restoration Plan CERP a 17 billion taxpayer funded initiative aimed at reclaiming this vital ecosystem Green explains that like the meandering River of Grass the progress of CERP rarely runs straight especially when it comes up against the fierce efforts of sugar growing interests or Big Sugar to obstruct the cleanup of fertilizer runoff wreaking havoc with restoration This engrossing expos tackles some of the most important issues of our time Is it possible to save a complex ecosystem such as the Everglades or once degraded are such ecological wonders gone forever What kind of commitments economic scientific and social will it take to rescue our vulnerable natural resources What influences do special interests wield in our everyday lives and what does it take to push real reform through our democracy A must read for anyone fascinated by stories of political intrigue and the work of environmental crusaders like Erin Brockovich as well as anyone who cares about the future of Florida this book reveals why the Everglades serve as a model and a warning for environmental restoration efforts worldwide *Moving Water* Joan Skogan, 1998-09-16

Joan Skogan's marvelously poetic new novel draws upon her own years adrift on the sea as a wanderer and wonderer to tell the story of Rose Bachmann a woman at mid tide in a life awash in the debris of a mysterious marriage in myths both long known and newly invented and in the magical coastline of the North Pacific Rose finds herself at rest in the rock form of a petroglyph entitled The One Who Fell From Heaven near Prince Rupert B C and there she imagines in a brilliant song to her past and those she has loved voyages both real and surreal and the currents of an existence that have brought her to this place this truth It is a story winding its way toward the I a story which opens to engulf the Skeena and the St Lawrence the Danube and the Tigris swallowing the very self Rose has given over to propulsion and discovery It is a quest which roams the swelling waves of personal history and may of the world's unfathomable waterways at once as the title suggests in motion yet serenely still
