Cho, 2013-01-30 Cancer is one of the leading killers in the world and the incidence is increasing but most cancer patients and cancer survivors suffer much from the disease and its conventional treatments side effects In the past clinical data showed that some complementary and alternative medicine CAM possessed anticancer

abilities but some clinicians and scientists have queried about the scientific validity of CAM due to the lack of scientific evidence. There is great demand in the knowledge gap to explore the scientific and evidence based knowledge of CAM in the anticancer field. With this aim a book series is needed to structurally deliver the knowledge to readers. Integrative therapies comprise a variety of non pharmacological interventions that assist in alleviating physical and psychological symptoms. Apart from being a life threatening disease cancer and its therapy are usually associated with a significant deterioration in the quality of life. There is growing evidence that non pharmacological therapies provide symptom and pain management in cancer palliation. This volume is a specialised book presenting the research evidence relevant to the application of a range of commonly used non pharmacological interventions in supportive cancer care including massage acupuncture Qigong yoga mind body therapy mindfulness based intervention and aromatherapy. A number of scientific researches and clinical studies support that these therapies offer potential beneficial effects for cancer patients in terms of reducing pain anxiety and other symptoms. Indeed non pharmacological therapies are increasingly gaining acceptance in the healthcare community as complementary to conventional cancer treatments. Most of them are non invasive inexpensive and useful in improving quality of life and they may be accessed by patients themselves.

The Patient Experience Brian Boyle, 2015-03-31

Brian Boyle tells a personal story of his fight back from near death after a horrific automobile accident. He focuses on his experience as a patient who while in a two month long medically induced coma was unable to move or talk to anyone around him yet he was able to hear, see and feel pain. Brian slowly clawed his way back to the living and found the strength to live to tell his story in his acclaimed memoir *Iron Heart*. Now Brian provides vital information from the patient's perspective to help caregivers gain valuable insight that will help them understand new ways on how to provide care to both patients and their families. By completion of this book the participant will be able to:

- Recognize the variety of feelings and emotions of the patient
- Identify simple methods and interventions to provide emotional support to relax the patient
- Determine the importance of particular amenities to a patient who may be unable to communicate
- Evaluate patient life history to determine appropriate intervention techniques
- Understand the motivational role that communication has between the healthcare provider and the patient and his or her family

Brian's story about catastrophe survival and transcending all odds has implemented new and innovative strategies for improving patient safety and quality of care on a national level as well as serving as a learning experience for healthcare providers of all levels and backgrounds. When it comes to the patient experience, Brian has become a mouthpiece for the voiceless.
