Neoclassical Architecture In Copenhagen And Athens:

Neoclassical Architecture in Copenhagen & Athens Lisbet Balslev Jørgensen, 1987 **Neoclassical Architecture in Copenhagen & Athens** Lisbet Balslev Jørgensen, Demetri Porphyrios, 1987 **Neoclassical Architecture in Greece** Manos G. Birēs, Marō Kardamitsē-Adamē, 2004 In addition to Athens many cities and towns throughout Greece followed the same architectural trend expressed in the form of either Neoclassicism or late historicism The urban landscape that emerged in Greece through the early twentieth century includes buildings that are remarkable both architecturally and artistically Today they attract an intense and growing interest Jacket *The Classical Heritage in Nordic Art and Architecture* Marjatta Nielsen, 1990 This volume contains eighteen articles dealing with the reception of Classical art and architecture in the Scandinavian countries mainly Denmark from the Renaissance onwards This volume is the publication of an interdisciplinary seminar held at the University of Copenhagen 1988 with the participation of archaeologists and art historians

Architecture in the Scandinavian Countries Marian Card Donnelly, 1992 The most complete survey of Nordic architecture available today **Organic Design in Twentieth-Century Nordic Architecture** Erik Champion, 2019-02-18 Organic Design in Twentieth Century Nordic Architecture presents a communicable and useful definition of organic architecture that reaches beyond constraints The book focuses on the works and writings of architects in Nordic countries such as Sigurd Lewerentz Jørn Utzon Sverre Fehn and the Aaltos Aino Elissa and Alvar among others It is structured around the ideas of organic design principles that influenced them and allowed their work to evolve from one building to another Erik Champion argues organic architecture can be viewed as a concerted attempt to thematically unify the built environment through the allegorical expression of ongoing interaction between designer architectural brief and building as process With over 140 black and white images this book is an intriguing read for architecture students and professionals alike **The Routledge Handbook on the Reception of Classical Architecture** Nicholas Temple, Andrzej Piotrowski, Juan Manuel Heredia, 2019-11-01 This is the first comprehensive study of the reception of classical architecture in different regions of the world Exploring the impact of colonialism trade slavery religious missions political ideology and intellectual artistic exchange the authors demonstrate how classical principles and ideas were disseminated and received across the globe By addressing a number of contentious or unresolved issues highlighted in some historical surveys of architecture the chapters presented in this volume question long held assumptions about the notion of a universally accepted classical tradition and its broadly Euro centric perspective Featuring thirty two chapters written by international scholars from China Europe Turkey North America Mexico Australia and New Zealand the book is divided into four sections 1 Transmission and re conceptualisation of classical architecture 2 Classical influence through colonialism political ideology and religious conversion 3 Historiographical surveys of geographical regions and 4 Visual and textual discourses This fourfold arrangement of chapters provides a coherent structure to accommodate different perspectives of classical reception across the world and their geographical ethnographic

ideological symbolic social and cultural contexts Essays cover a wide geography and include studies in Italy France England Scotland the Nordic countries Greece Austria Portugal Romania Germany Poland India Singapore China the USA Mexico Brazil New Zealand and Australia Other essays in the volume focus on thematic issues or topics pertaining to classical architecture such as ornament spolia humanism nature moderation decorum heresy and taste An essential reference guide

The Routledge Handbook on the Reception of Classical Architecture makes a major contribution to the study of architectural history in a new global context *Classical Heritage and European Identities* Lærke Maria Andersen Funder, Troels Myrup Kristensen, Vinnie Nørskov, 2019-02-11 Classical Heritage and European Identities examines how the heritages of classical antiquity have been used to construct European identities and especially the concept of citizenship in Denmark from the eighteenth century to the present day It implements a critical historiographical perspective in line with recent work on the reception of classical antiquity that has stressed the dialectic relationship between past present and future Arguing that the continuous employment and appropriation of lassical heritages in the Danish context constitutes an interesting case of an imagined geography that is simultaneously based on both national and European identities the book shows how Denmark s imagined geography is naturalized through very distinctive uses of classical heritages within the educational and heritage sectors Chapter 1 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license *The Cambridge Companion to Ancient Athens* Jenifer Neils, Dylan K. Rogers, 2021-02-18 This book is a comprehensive introduction to ancient Athens its topography monuments inhabitants cultural institutions religious rituals and politics Drawing from the newest scholarship on the city this volume examines how the city was planned how it functioned and how it was transformed from a democratic polis into a Roman urbs *The Rebirth of Athens* Eleni Bastéa, 1989 [Proceedings of the Danish Institute at Athens](#) Rune Frederiksen, Søren Handberg, Kristina Winther Jacobsen, 2017-05-04 [Avery Index to Architectural Periodicals](#) Avery Library, 1997 **Acta Hyperborea** , 1988 **Cuban Modernism** Victor Deupi, Jean-François Lejeune, 2021-02-08 In the 20th century modern architecture thrived in Cuba and a wealth of buildings was realized prior to the revolution 1959 and in its wake The designs comprise luxurious nightclubs and stylish hotels sports facilities elegant private homes and apartment complexes Drawing on the vernacular their architects defined a way to be modern and Cuban at the same time creating an architecture oscillating between tradition and avantgarde Audacious concrete shells curving ramps elegant brises soleils and a fluidity of interior and exterior spaces are characteristic of an airy often colorful architecture well suited to life in the tropics New photographs and drawings were specially prepared for this publication A biographical survey portraits the 40 most important Cuban architects of the era *Architecture and Tourism* D. Medina Lasansky, Brian McLaren, Brian D. McLaren, 2004-05-15 Publisher description see [Historical Dictionary of Neoclassical Art and Architecture](#) Allison Lee Palmer, 2020-05-15 Neoclassicism refers to the revival of classical art and architecture beginning in Europe in the 1750s until

around 1830 with late neoclassicism lingering through the 1870s It is a highly complex movement that brought together seemingly disparate issues into a new and culturally rich era one that was unified under a broad interest in classical antiquity The movement was born in Italy and France and spread across Europe to Russia and the United States It was motivated by a desire to use ideas from antiquity to help address modern social economic and political issues in Europe and neoclassicism came to be viewed as a style and philosophy that offered a sense of purpose and dignity to art following the new enlightened thinking This second edition of Historical Dictionary of Neoclassical Art and Architecture contains a chronology an introduction and an extensive bibliography The dictionary section has over 300 cross referenced entries cover late Baroque and Rococo tendencies found in the early 18th century and span the century to include artists who moved from neoclassicism to early romanticism This book is an excellent resource for students researchers and anyone wanting to know more about neoclassical art and architecture
