HAND-DYEING TISSUE PAPER GILL. BARRETT, 2026 The Dyeing of Leather with the Dyestuffs of Cassella Color
Company Cassella Color Company, 191? **Application of Dyestuffs** J. Merritt Matthews, 2015-07-21 Excerpt from
Application of Dyestuffs To d104iles Paper Leather and Other Materials The present volume has been the result of a
comprehensive and more extended development of the author's earlier book entitled Laboratory Manual of Dyeing and
d104ile Chemistry The latter was designed principally as a text book for students and necessarily omitted a great deal of
matter of more general and practical interest The present book while still retaining many of the text book features in order to
adapt it to the needs of the student has been greatly broadened in its scope so as to appeal to the interest of all those
concerned in the application of dyestuffs Dyestuffs are most largely used in the textile industries and naturally this field has
received the greatest attention at the hands of the author but there has also been included a discussion of the use of dyes in
other lines of industry though the limitations of space as well as the necessity of maintaining a proper balance in the subjects
considered has precluded more than a brief survey of these interesting fields The method of presentation as well as the
subject matter herein contained have been the outcome of a number of years of teaching on the part of the author
supplemented by a larger number of years of active professional practice in this field of applied chemistry Care has been
taken to avoid a too purely scientific generalization else the volume would lose much of its value for purposes of instruction
and information The subject treated is a technical one and an endeavor has been made to present it in a technical manner
that is to say definite facts have been presented in a definite form To this end an experimental outline has been distributed
through the different chapters both to act as a laboratory guide for the teacher and student and also to furnish concrete
examples to the general reader The author has endeavored as far as his limitations permit to incorporate in this book the
latest knowledge of the subject In the case of dyestuffs this has been rather difficult at the present time owing to the
tremendous impetus the manufacture of dyestuffs has received in both America and England during the last few years
together with the shutting off from the world of the long used and well known German dyes About the Publisher Forgotten
