Burdon, 2014-09-19 The idea of human dominion over nature has become entrenched by the dominant rights based interpretation of private property Accordingly nature is not attributed any inherent value and becomes merely the matter of a human property relationship *Earth Jurisprudence Private Property and the Environment* explores how an alternative conception of property might be instead grounded in the ecocentric concept of an Earth community Recognising that human beings are deeply interconnected with and dependent on nature this concept is proposed as a standard and measure for human law This book argues that the anthropocentric institution of private property needs to be reconceived drawing on international case law indigenous views of property and the land use practices of agrarian communities Peter Burdon considers how private property can be reformulated in a way that fosters duties towards nature Using the theory of earth jurisprudence as a guide he outlines an alternative ecocentric description of private property as a relationship between and among members of the Earth community This book will appeal to those researching in law justice and ecology as well as anyone pursuing an interest more particularly in earth jurisprudence

Contesting Earth's Future Michael E. Zimmerman, 2023-11-15 Radical ecology typically brings to mind media images of ecological activists standing before loggers saws staging anti nuclear marches and confronting polluters on the high seas Yet for more than twenty years

the activities of organizations such as the Greens and Earth First have been influenced by a diverse less publicized group of radical ecological philosophers. It is their work, the philosophical underpinnings of the radical ecological movement, that is the subject of *Contesting Earth's Future*. The book offers a much needed balanced appraisal of radical ecology's principles, goals, and limitations. Michael Zimmerman critically examines the movement's three major branches: deep ecology, social ecology, and ecofeminism. He also situates radical ecology within the complex cultural and political terrain of the late twentieth century, showing its relation to Martin Heidegger's anti-technological thought, 1960s counterculturalism, and contemporary theories of poststructuralism and postmodernity. An early and influential ecological thinker, Zimmerman is uniquely qualified to provide a broad overview of radical environmentalism and delineate its various schools of thought. He clearly describes their defining arguments and internecine disputes, among them the charge that deep ecology is an anti-modern, proto-fascist ideology. Reflecting both the movement's promise and its dangers, this book is essential reading for all those concerned with the worldwide ecological crisis. Radical ecology typically brings to mind media images of ecological activists standing before loggers' saws, staging anti-nuclear marches, and confronting polluters on the high seas. Yet for more than twenty years, the activities of organizations such as Self, Earth, and Society (Thomas N. Finger, 2020-03-12) are experiencing unparalleled and rapid transience. The twentieth century began with the telephone and ended with e-mail. People change jobs and homes a half-dozen times or more in their lives. Air and water pollution are threatening the well-being of the earth itself. Wars, their multiplying refugees, and political crises are tearing societies apart. If there is a key word for our era, it might be alienation. Amid increasing and often chaotic complexity, individuals struggle to attain an integrated, stable self with durable relationships. An expanding ecological consciousness reveals our estrangement from the earth. Societies are internally divided by clashing political and economic perspectives and processes. This profound and important book recognizes and reveals the connections among these three alienations. Thomas Finger undertakes a probing, critical conversation with culture and develops his own public theology. Each alienation is analyzed in depth through the writings of secular authors. His theological construction draws neither on modern philosophy nor worldviews but perhaps surprisingly on Scripture. To support his emphasis on Christ, Finger engages the skepticism of the much-celebrated Jesus Seminar. He rejects the widespread claim that Christianity's transcendent God is largely absent from the world and legitimates human exploitation of it. For transcendence means that God is different but not distant from the world. Finger then examines the roles of Jesus, Father, and Spirit in his earthly ministry. In this and later scriptures, these three act and interact in a salvific manner that can only be divine. This means that his Father and Spirit also suffer with Jesus in his death and with all creation as Jürgen Moltmann brilliantly explains and accompany him in his resurrection. This also means that the creation exists in God as some feminists maintain and originated as the overflow of God's love and character into a realm which was hardly distant from God yet very different. In addition, this entails that every human self and the process of becoming a self as God's creations must be

respected as indeed must all earthly creatures and the basic structures needed to form and maintain any society Theological developments in the last decade have done much to critique misguided biblical interpretations which would justify unbridled human exploitation and abuse of creation But work in exploring how an understanding of a trinitarian transcendent God results in creative and caring relationship between humanity and creation has been less developed In discussing these matters with Dr Finger I am convinced that his proposed work holds the promise of meeting an important need within global theological discussions today Further I know that Dr Finger is fully capable of accomplishing this project Thus from my vantage point where I have the opportunity of hearing theological discussions on these subjects from the major Christian traditions and from throughout the globe it is clear that Dr Finger s proposal will fill a theological void and enrich our search for truth Wesley Granberg Michaelson Executive Secretary Commission on Church and Society World Council of Churches 1988 1994 General Secretary Reformed Church in America 1994 2011 **Grassroots Associations** David Horton Smith, 2000-05-11 This volume explores the world of grassroots organizations and outlines their history while differentiating them from the more familiar paid staff nonprofit organizations David Horton Smith a leading scholar on the nonprofit and voluntary sector examines the available empirical research on the topic and analyzes the theoretical concepts that have come to define such associations He affords the reader a complete detailed description of the nature and characteristics of grassroots organizations their formation structure leadership life cycle effectiveness and their integral role in postmodern societies
