Lee, 2013-03-12 There Is a Garden in the Mind presents an engaging look at the work and life of pioneering organic gardener Alan Chadwick and his profound influence on the organic farming movement In this wide ranging and philosophical memoir author Paul Lee recounts his first serendipitous meeting with Chadwick in Santa Cruz California in 1967 and their subsequent founding of the

Chadwick Garden at UC Santa Cruz the first organic and biointensive garden at a U S university Today there are few who would dispute the ecological and health benefits of organically produced food and the student garden project founded by Chadwick and Lee has evolved into a world renowned research center that helps third world farmers obtain high yields using organic gardening But when Chadwick and Lee first broke ground in the 1960s the term organic belonged to the university s chemists and the Chadwick Garden spurred a heated battle against the whole system of industrial existence Lee s memoir contextualizes this struggle by examining the centuries old history of the conflict between industrial science and organic nature the roots of the modern environmental movement and the slow food movement and the origin of the term organic His account of Chadwick s work fills in a gap in the history of the sustainable agriculture movement and proposes that Chadwick s groundwork continues to bear fruit in today s burgeoning urban garden locavore and self sufficiency movements
