**Queer Premises** Ben Campkin, 2023-06-01 Queer premises provide vital social and cultural infrastructure a queer infrastructure connecting different generations and locations facilitating the movement of resources across and beyond the city Queer Premises offers evidence for how London's diverse LGBTQ populations have embedded themselves into urban space systems and resources It sets out to understand how across their different material dimensions bars cafés nightclubs pubs community centres and hybrids of these typologies have been imagined created and sustained From the 1980s to the present Campkin asks how where and why these venues have been established how they operate and the purposes they serve what challenges they face and why they close down

**Queer Constellations** Dianne Chisholm, *Queer Constellations* investigates the dreams and catastrophes of recent urban history viewed through new queer narratives of inner city life The gay village gay mecca gai Paris the lesbian flaneur the lesbian bohème these and other urban phantasmagoria feature paradoxically in this volume as figures of revolutionary utopia and commodity spectacle as fossilized archetypes of social transformation and ruins of haunting cultural potential Dianne Chisholm introduces readers to new practices of walking seeing citing and remembering the city in works by Neil Bartlett Samuel Delany Robert Gluck Alan Hollinghurst Gary Indiana Eileen Myles Sarah Schulman Edmund White and David Wojnarowicz Reading these authors with reference to the history sociology geography and philosophy of space particularly to the everyday avant garde production and practice of urban space Chisholm reveals how and how effectively queer narrative documentary resembles and reassembles Walter Benjamin's constellations of Paris capital of the nineteenth century Considering experimental queer writing in critical conjunction with Benjamin's city writing the book shows how a queer perspective on inner city reality exposes contradictions otherwise obscured by mythic narratives of progress If Benjamin regards the Paris arcade as a microcosm of high capitalism wherein the unmaking of industrial society is perceived retrospectively in contemporary queer narrative we see the sexually charged and commodity entranced space of the gay bathhouse as a microcosm of late capitalism and as an exemplary site for excavating the contradictions of mass sex In Chisholm's book we discover how looking back on the ruins of queer mecca queer authors return to Benjamin to advance his dialectics of seeing how they cruise the paradoxes of market capital blasting a queer era out of the homogeneous course of history

**Queer Media in China** Hongwei Bao, 2021-05-30 This book examines different forms and practices of queer media that is the films websites zines and film festivals produced by for and about lesbian gay bisexual transgender and queer LGBTQ people in China in the first two decades of the twenty first century It traces how queer communities have emerged in urban China and identifies the pivotal role that community media have played in the process It also explores how these media

shape community cultures and perform the role of social and cultural activism in a country where queer identities have only recently emerged and explicit forms of social activism are under serious political constraints. Importantly because queer media is niche and narrowcasting rather than broadcasting and mass communication the subject compels a rethinking of some often taken for granted assumptions about how media relates to the state the market and individuals. Overall the book reveals a great deal about queer communities and identities queer activism and about media and social and political attitudes in China.

*Queer Singapore* Audrey Yue, Jun Zubillaga-Pow, 2012-10-01 Singapore remains one of the few countries in Asia that has yet to decriminalize homosexuality. Yet it has also been hailed by many as one of the emerging gay capitals of Asia. This book accounts for the rise of mediated queer cultures in Singapore's current milieu of illiberal citizenship. This collection analyses how contemporary queer Singapore has emerged against a contradictory backdrop of sexual repression and cultural liberalisation. Using the innovative framework of illiberal pragmatism established and emergent local scholars and activists provide expansive coverage of the impact of homosexuality on Singapore's media cultures and political economy including law religion the military literature theatre photography cinema social media and queer commerce. It shows how new LGBT subjectivities have been fashioned through the governance of illiberal pragmatism how pragmatism is appropriated as a form of social and critical democratic action and how cultural citizenship is forged through a logic of queer complicity that complicates the flows of oppositional resistance and grassroots appropriation.

*Speaking in Queer Tongues* William Leap, Tom Boellstorff, 2004 Language is a fundamental tool for shaping identity and community including the expression or repression of sexual desire. *Speaking in Queer Tongues* investigates the tensions and adaptations that occur when processes of globalization bring one system of gay or lesbian language into contact with another. Western constructions of gay culture are now circulating widely beyond the boundaries of Western nations due to influences as diverse as Internet communication global dissemination of entertainment and other media increased travel and tourism migration displacement and transnational citizenship. The authority claimed by these constructions and by the linguistic codes embedded in them is causing them to have a profound impact on public and private expressions of homosexuality in locations as diverse as sub-Saharan Africa New Zealand Indonesia and Israel. Examining a wide range of global cultures *Speaking in Queer Tongues* presents essays on topics that include old versus new sexual vocabularies the rhetoric of gay oriented magazines and news media verbal and nonverbalized sexual imagery in poetry and popular culture and the linguistic consequences of the globalized gay rights movement.

Doan, 2016-05-23 Current planning practices have largely neglected the needs of the Lesbian Gay Bisexual and Transgender LGBT community for safe urban spaces in which to live work and play This volume fills the gap in the literature on the planning and development of queer spaces and highlights some of the resistance within the planning profession to incorporate gay and lesbian concerns into the planning mainstream Planning lags behind other disciplines concerned with

queer urban issues In contrast the field of geography has developed a rich sub specialty in the geographies of sex and gender that examines spaces and the variety of non heteronormative populations that inhabit them This volume brings together both planners and geographers with experience in planning to examine some of the fundamental assumptions of urban planning as they relate to the LGBT community The first few chapters are substantial revisions and expansions of earlier influential work on planning for non conformist populations and the preservation of LGBT neighborhoods Subsequent chapters comprise original contributions that draw on the rich literature from queer theory planning theory and the geography of sexualities to explore the ways that nonconformist populations struggle with heteronormative expectations embedded in planning theory and procedures These chapters consider the intersection of planning and a range of populations including transgendered and gender variant individuals Subsequent chapters examine the ways that variations in the scale of urban and regional governance influence local politics around the implementation of more equitable policies at the city level In addition several chapters critically examine the implications of using the tolerance component of Richard Florida s creative cities arguments The final section consists of two chapters that explore the ways that urban planning regimes have been used to regulate sexually oriented businesses and the way this regulation of sexualized spaces has implications on the heteronormativity of plans and planners In summary these chapters interrogate planning practice and pose questions for academic and professional planners about the ways that the queer community and its needs for spaces have shifted What do those changes mean for the practice of planning 40 years after the North American Stonewall rebellion and looking forward to the next 40 years To what extent does existing planning practice constrain the evolution of queer communities or seek to commercialize such spaces to the benefit of large developers and the detriment of marginalized members of the community How might planning practice change to provide more direct support to the evolution of queer people and the spaces in which they live This volume draws on these insights as well as the experiences of the various authors to lay out possible future directions for the field of planning to create truly inclusive urban areas

*Planning and LGBTQ Communities* Petra L. Doan, 2015-03-24

Although the last decade has seen steady progress towards wider acceptance of lesbian gay bisexual transgendered and queer LGBTQ individuals LGBTQ residential and commercial areas have come under increasing pressure from gentrification and redevelopment initiatives As a result many of these neighborhoods are losing their special character as safe havens for sexual and gender minorities Urban planners and municipal officials have sometimes ignored the transformation of these neighborhoods and at other times been complicit in these changes *Planning and LGBTQ Communities* brings together experienced planners administrators and researchers in the fields of planning and geography to reflect on the evolution of urban neighborhoods in which LGBTQ populations live work and play The authors examine a variety of LGBTQ residential and commercial areas to highlight policy and planning links to the development of these neighborhoods Each chapter explores a particular urban context and asks how the field of planning has enabled facilitated and or neglected the

specialized and diverse needs of the LGBTQ population A central theme of this book is that urban planners need to think beyond queer space because LGBTQ populations are more diverse and dispersed than the white gay male populations that created many of the most visible gayborhoods The authors provide practical guidance for cities and citizens seeking to strengthen neighborhoods that have an explicit LGBTQ focus as well as other areas that are LGBTQ friendly They also encourage broader awareness of the needs of this marginalized population and the need to establish more formal linkages between municipal government and a range of LGBTQ groups Planning and LGBTQ Communities also adds useful material for graduate level courses in planning theory urban and regional theory planning for multicultural cities urban geography and geographies of gender and sexuality
