World War I represents one of the most studied yet least understood systemic conflicts in modern history. At the time it was a major power war that was largely unexpected. This book refines and expands points made in the author's earlier work on the failure to prevent World War I. It provides an alternative viewpoint to the thesis of Christopher Clark, Fritz Fischer, Paul Kennedy, among others, as to the war's long-term origins. By starting its analysis with the causes and consequences of the 1870-71 Franco-Prussian War and the German annexation of Alsace-Lorraine, the study systematically explores the key geostrategic, political, economic, and socio-cultural ideological disputes between France, Germany, Austria-Hungary, Italy, Russia, Japan, the United States, and Great Britain, the nature of their foreign policy goals, alliance formations, arms rivalries, as well as the dynamics of the diplomatic process, so as to better explain the deeper roots of the Great War. The book concludes with a discussion of the war's relevance and the diplomatic failure to forge a possible Anglo-German-French alliance, while pointing out how it took a second world war to realize Victor Hugo's nineteenth-century vision of a United States of Europe, a vision now being challenged by financial crisis and Russia's annexation of Crimea.

*Garden of the World* Cecilia M. Tsu, 2013-06-01. Nearly a century before it became known as Silicon Valley, the Santa Clara Valley was world renowned for something else: the succulent fruits and vegetables grown in its fertile soil. In *Garden of the World*, Cecilia Tsu tells the overlooked intertwined histories of the Santa Clara Valley's agricultural past and the Asian immigrants who cultivated the land during the region's peak decades of horticultural production. Weaving together the story of three overlapping waves of Asian migration from China, Japan, and the Philippines in the nineteenth and twentieth centuries, Tsu offers a comparative history that sheds light on the ways in which Asian farmers and laborers fundamentally altered the agricultural economy and landscape of the Santa Clara Valley, as well as white residents' ideas about race, gender, and what it meant to be an American family farmer. At the heart of American racial and national identity in the nineteenth and twentieth centuries was the family farm ideal: the celebration of white European American families operating independent, self-sufficient farms that would contribute to the stability of the nation. In California, by the 1880s, boosters promoted orchard fruit growing as one of the most idyllic incarnations of the family farm ideal, and the lush Santa Clara Valley, the finest location to live out this agrarian dream. But in practice, many white growers relied extensively on hired help, which in the late nineteenth and early twentieth centuries was largely Asian. Detailing how white farmers made racial and gendered claims to defend their dependence on nonwhite labor, how those claims shifted with the settlement of each Asian immigrant group, and how Chinese, Japanese, and Filipinos sought to create their own version of the American dream in farming, Tsu excavates the social and economic history of agriculture in this famed rural community to reveal the intricate nature of race relations there.
