Hudson,2010-05-24 Interdisciplinary and Sustainability Issues in Food and Agriculture is a component of Encyclopedia of Food and Agricultural Sciences Engineering and Technology Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The Theme on Interdisciplinary and Sustainability Issues in Food and Agriculture provides the essential aspects and discusses a number of issues of importance in the development of specific agriculture and food supply systems that are closely related to general developmental trends of humankind In this context technology and economic development as well as socio cultural developments affect productivity and a secure supply with food These three volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs Food Environment Education Lindsay Falvey,1996 Forword It was agriculture that enabled human beings to become producers rather than hunters and gatherers and in doing so to settle into communities From these earliest settlements have developed the elaborate and complex societies of today During all these millennia we have tended to take agriculture for granted This is unfortunate and unfair by all those farm men and women in the fields scientists in their laboratories and policy makers in parliaments and elsewhere for instance who have contributed to the development of agriculture an enterprise that is as significant as it is exciting The history of modern agriculture which has made possible the greatest leap in well being that the human family has yet experienced has seen the integration of research based knowledge with traditional wisdom to bring about great improvements in agricultural varieties farming techniques and management practices The consequence of that marriage has been undreamed of increases of food productivity which served as the center of concentric circles of progress Understanding that process and more important the substance that made and can continue to make that process work is the task of agricultural education The origins of agricultural education as we know it today and the challenges that lie ahead of it are the central themes of this marvelous little book by Dean Lindsay Falvey This is a very personal book It is not just a scholarly recounting of events an arid collection of theories or a series of anecdotal episodes strung together It bespeaks intense knowledge of the subject and material as well as personal experience in the field Most of all however it presents agricultural education as a societal endeavor whose future development is of clear relevance to the progress of all people everywhere It is presented with a rare combination of erudition and a warm sense of humanity The major challenge for the future as he points out is for agricultural education to explore and fully comprehend the complex interactions of science people and the environment to strengthen its relevance by grappling with the scientific issues both national and international that affect the continued transformation of agriculture and the protection of the natural resources on which agriculture depends For all those like myself who believe that agriculture and agricultural research more specifically stand at the very heart of the future

of humanity it is important to be aware of the strength and the weaknesses of current agricultural education It is only from that starting point that we can move towards ensuring that agricultural education remains relevant interesting and vibrant Dean Falvey makes a signal contribution to helping us acquire such understanding He makes the material easily accessible in an engaging and user friendly style He has organized his text in such a way that it can attract many classes of readers He caters to the needs of browsers dedicated readers who have not succumbed to the sound bite syndrome teachers who seek out resource material students who want to be inspired specialists who are interested only in information on a particular topic or even those who do not wish to handle a book at all but want access to it in electronic form For those who want their minds to soar there is poetry as well This is truly a book for our times by an author whose knowledge and interests are not bound by time From yesterday s experience he challenges us to create bright tomorrows Dare we evade that challenge Ismail Serageldin Chairman The Consultative Group on International Agricultural Research Vice President for Environmentally Sustainable Development The World Bank

Endurance Deb Anderson,2014-11-05 Endurance presents stories of ordinary Australians grappling with extraordinary circumstances providing insight into their lives their experiences with drought and their perceptions of climate change The book opens with the physical impacts science politics and economics of drought and climate change in rural Australia It then highlights the cultural and historical dimensions taking us to the Mallee wheat belt where researcher Deb Anderson interviewed farm families from 2004 to 2007 as climate change awareness grew Each story is grouped into one of three themes Survival Uncertainty and Adaptation Illustrated with beautiful colour photographs from Museum Victoria Endurance will appeal to anyone with an interest in life stories rural Australia and the environment

Thai Agriculture Lindsay Falvey,2000 The history science and social aspects of today s Thai agriculture is traced from hunters and gatherers through agro cities through State religious Empires and

immigrating Tai to produce a sustainable agriculture The wet glutinous rice culture determined administrative structures in a pragmatic society which regularly produced a saleable surplus Continuing today these systems consolidated the importance of rice agriculture to national security and economic well being as Chinese and European influence benefited agribusiness and initiated the demand which would expand agriculture through population increase until accessible land was expended As agriculture declined in relative financial importance it continued to provide the benefits of employment crisis resilience self sufficiency rural social support and cultural custody Agricultural institutions evolved from a taxation and dispute resolution base to provide research education and technology transfer at levels below potential as they supported commercial agriculture funded by credit Agribusiness expanded from the 1960s and small holders were partly viewed as a past relic which agribusiness could modernise Unique elements of Thai agriculture include irrigation technologies administrative structures based on water control global leadership in many agricultural commodities multinational agribusiness negotiating approaches potential for further increases from known technologies and an open culture which has embraced new ideas One of the world s few major agricultural exporters Thailand leads the world in rice rubber canned pineapple and black tiger prawn production and export the region in chicken meat export and several other commodities and feeds more the four times its own population from less intensive agriculture than its neighbours Poised to benefit from expansion in livestock demand poverty reduction and improved education research and legal and social systems evident in the recent Asian financial crisis will be considered with popular concern for socially sensitive alternatives for small holder farmers to co exist with commercial agriculture Thailand will likely remain one of the world s major agricultural countries in social environmental and economic terms for the foreseeable future as it addresses the continuing rural issues of poverty and inequity
