Edwards,2011-01-16 This book describes in detail the attributes of learning communities and how these characteristics help students acquire a sense of moral responsibility and commitment to fellow students Clifford H

Edwards provides an account of how schools fail to satisfy student needs and thus promote discipline problems. Special attention is given to children's need for self-direction and how empowering them can promote more responsible learning involvement. There is also a focus on the factors that motivate learning and those that do not and how teachers can help their students become more intrinsically interested in school learning. Constructivist learning theory is presented as the most accepted explanation of how children learn and how it articulates with the learning community approach to education. The inquiry learning strategy is given as the most effective way to apply constructivist learning theory in classrooms. Appropriate relationships and effective communications are presented as essential components of learning communities and how they accentuate the effectiveness of this learning orientation. Democratic discipline within learning communities is described in detail.

Core Questions in Philosophy Elliott Sober, 2021-05-26. Written in an engaging lecture style format, this 8th edition of *Core Questions in Philosophy* shows students how philosophy is best used to evaluate many different kinds of arguments and to construct sound theories. Well-known historical texts are discussed not as a means to honor the dead or merely to describe what various philosophers have thought but to engage with, criticize, and even improve ideas from the past. In addition, because philosophy cannot function apart from its engagement with the wider society, traditional and contemporary philosophical problems are brought into dialogue with the physical, biological, and social sciences. Text boxes highlight key concepts and review questions; discussion questions and a glossary of terms are also included. *Core Questions in Philosophy* has served as a premier introductory textbook for three decades, with updates to each new edition. Key updates to this 8th edition include: A new chapter on Probability and Bayes Theorem; A new explanation of the concept of soundness as a useful tool in assessing arguments; A clearer explanation in the chapter on evolution of the crucial biological idea that the similarities of different species provide evidence of their common ancestry; A new discussion of evolutionary altruism in the chapter on psychological egoism; A presentation of two interesting arguments from historically important Islamic and Confucian philosophers; Improved clarity and updated material from philosophy and empirical research throughout. Revisions to the online list of recommended resources include additional recommendations of supplementary readings with the inclusion of more work from female philosophers. New recommended videos and podcasts are all organized by their relevance to each chapter in the book.

Principle Based Investing: A Sensible Guide to Investment Success Alan F. Skrainka, 2014-06-19. Principle Based Investing is the belief that principles must guide our long-term investment decisions and that predictions are useless regardless of the source. Principles are the foundation of sensible investing. They are what allow us to ignore the day-to-day noise and emotional clatter that can jeopardize rational thinking and sound investment decision making. In this sensible, well-reasoned book, Alan Skrainka draws on his many years as a successful investment manager to describe the process he has followed to help investors attain their specific objectives. These principles provide the guidance to enable investors to set a logical course, stay on course, and gain the advantages of a sound long-term investment program. Take these

lessons to heart They ll make your investment voyage easier and more successful Clearly the proof is in the principles

Moral Tribes Joshua Greene,2014-12-30 Surprising and remarkable Toggling between big ideas technical details and his personal intellectual journey Greene writes a thesis suitable to both airplane reading and PhD seminars The Boston Globe Our brains were designed for tribal life for getting along with a select group of others Us and for fighting off everyone else Them But modern times have forced the world s tribes into a shared space resulting in epic clashes of values along with unprecedented opportunities As the world shrinks the moral lines that divide us become more salient and more puzzling We fight over everything from tax codes to gay marriage to global warming and we wonder where if at all we can find our common ground A grand synthesis of neuroscience psychology and philosophy Moral Tribes reveals the underlying causes of modern conflict and lights the way forward Greene compares the human brain to a dual mode camera with point and shoot automatic settings portrait landscape as well as a manual mode Our point and shoot settings are our emotions efficient automated programs honed by evolution culture and personal experience The brain s manual mode is its capacity for deliberate reasoning which makes our thinking flexible Point and shoot emotions make us social animals turning Me into Us But they also make us tribal animals turning Us against Them Our tribal emotions make us fight sometimes with bombs sometimes with words often with life and death stakes A major achievement from a rising star in a new scientific field Moral Tribes will refashion your deepest beliefs about how moral thinking works and how it can work better Hansard's Parliamentary Debates Great Britain.
