

Question Of Blood A

Johanne Charbonneau, André Smith

Question Of Blood A:

A Question of Blood Ian Rankin, 2008-09-18 The fourteenth Inspector Rebus novel and No 1 bestseller Two seventeen year olds are killed by an ex Army loner who has gone off the rails The mystery takes Rebus into the heart of a shattered community Ex Army himself Rebus becomes fascinated by the killer and finds he is not alone Army investigators are on the scene and won't be shaken off The killer had friends and enemies to spare and left behind a legacy of secrets and lies Rebus has more than his share of personal problems too He's fresh out of hospital but won't say how it happened Could there be a connection with a house fire and the unfortunate death of a petty criminal who had been harassing Rebus's colleague

Siobhan Clarke **Blood for Thought** Mira Balberg, 2017-09-26 Blood for Thought delves into a relatively unexplored area of rabbinic literature the vast corpus of laws regulations and instructions pertaining to sacrificial rituals Mira Balberg traces and analyzes the ways in which the early rabbis interpreted and conceived of biblical sacrifices reinventing them as a site through which to negotiate intellectual cultural and religious trends and practices in their surrounding world Rather than viewing the rabbinic project as an attempt to generate a nonsacrificial version of Judaism she argues that the rabbis developed a new sacrificial Jewish tradition altogether consisting of not merely substitutes to sacrifice but elaborate practical manuals that redefined the processes themselves radically transforming the meanings of sacrifice its efficacy and its value

Giving Blood Johanne Charbonneau, André Smith, 2015-07-24 Giving Blood represents a new agenda for blood donation research It explores the diverse historical and contemporary undercurrents that influence how blood donation takes place and the social meanings that people attribute to the act of giving blood Drawing from empirical studies conducted in the United States Canada France Australia China India Latin America and Africa the book's chapters turn our attention to the evolution of blood donation worldwide examining the impact of technology advances on blood collection practices the shifting approaches to donor recruitment and retention the governance and policy issues associated with the establishment of blood clinics the political and legal challenges of regulating blood systems This innovative examination moves the focus from individual explanations of rates of blood donation to a social structural explanation It will appeal to international scholars and students working in the areas of sociology medical anthropology health care public policy socio legal studies comparative politics organizational management health and illness the history of medicine and public health ethics *The Lawyers*

Paradox Anne O'Byrne, 2023-04-25 We regard genocidal violence as worse than other sorts of violence perhaps the worst there is But what does this say about what we value about the genos on which nations are said to be founded This is an urgent question for democracies We value the mode of being in time that anchors us in the past and in the future that is

among those who have been and those who might yet be If the genos is a group constituted by this generational time the demos was invented as the anti genos with no criterion of inheritance and instead only occurring according to the interruption of revolutionary time Insofar as the demos persists we experience it as a sort of genos for example the democratic nation state As a result democracies are caught in a bind disavowing genos thinking while cherishing the temporal forms of genos life they abhor genocidal violence but perpetuate and disguise it This is the genocide paradox O Byrne traces the problem through our commitment to existential categories from Aristotle to the life taxonomies of Linneaus and Darwin through anthropologies of kinship that tether us to the social world the shortfalls of ethical theory into the history of democratic theory and the defensive tactics used by real existing democracies when it came to defining genocide for the U N Genocide Convention She argues that although models of democracy all make room for contestation they fail to grasp its generational structure or acknowledge the generational content of our lives They cultivate ignorance of the contingency and precarity of the relations that create and sustain us The danger of doing so is immense It leaves us unprepared for confronting democracy's deficits and its struggle to entertain multiple temporalities In addition it leaves us unprepared for understanding the relation between demos and violence and the ability of good enough citizens to tolerate the slow burning destruction of marginalized peoples What will it take to envision an anti genocidal democracy

The Therapeutics of Gynecology and Obstetrics William Biddle Atkinson, 1881 **The Sunnyside**, 1927 **The History of Blood Transfusion in Sub-Saharan Africa** William H. Schneider, 2013-07-15 This first extensive study of the practice of blood transfusion in Africa traces the history of one of the most important therapies in modern medicine from the period of colonial rule to independence and the AIDS epidemic The introduction of transfusion held great promise for improving health but like most new medical practices transfusion needed to be adapted to the needs of sub Saharan Africa for which there was no analogous treatment in traditional African medicine This otherwise beneficent medical procedure also created a royal road for microorganisms and thus played a central part in the emergence of human immune viruses in epidemic form As with more developed health care systems blood transfusion practices in sub Saharan Africa were incapable of detecting the emergence of HIV As a result given the wide use of transfusion it became an important pathway for the initial spread of AIDS Yet African health officials were not without means to understand and respond to the new danger thanks to forty years of experience and a framework of appreciating long standing health risks The response to this risk detailed in this book yields important insight into the history of epidemics and HIV AIDS Drawing on research from colonial era governments European Red Cross societies independent African governments and directly from health officers themselves this book is the only historical study of the practice of blood transfusion in Africa *The New York Journal of Gynaecology and Obstetrics*, 1894
