Occupied Reading Alan A. Block,2023-05-31 Today's growing national concern about education centers on the paramount importance of teaching reading and writing This volume offers a rigorous examination of reading and the pedagogy of reading critically The book examines the crucial role of reading in the education of the child for the year 2000 and explores the history of reading and readers in America while surveying the attendant literacy debates The author examines the historical progress of American reading instruction demonstrating that how one is taught to read not only determines what one will read but also what is permissible to read and how pedagogies of reading define reading publics An important chapter focuses on reading as a process of identity construction that creates not only a text but shapes the person who reads that text The book also describes reading as a psychological process in which the creative act of manipulating the text produces the self and the world A final chapter discusses reading as the center of the educational system and examines methodologies An index is provided

A Confusion of the Spheres Genia Schönbaumsfeld,2010-03-11 Cursory allusions to the relation between Kierkegaard and Wittgenstein are common in philosophical literature but there has been little in the way of serious and comprehensive commentary on the relationship of their ideas Genia Sch nbaumsfeld closes this gap and offers new readings of Kierkegaard's and Wittgenstein's conceptions of philosophy and religious belief Chapter one documents Kierkegaard's influence on Wittgenstein while chapters two and three provide trenchant criticisms of two prominent attempts to compare the two thinkers those by D Z Phillips and James Conant In chapter four Sch nbaumsfeld develops Kierkegaard's and Wittgenstein's concerted criticisms of certain standard conceptions of religious belief and defends their own positive conception against the common charges of irrationalism and fideism As well as contributing to contemporary debate about how to read Kierkegaard's and Wittgenstein's work *A Confusion of the Spheres* addresses issues which not only concern scholars of Wittgenstein and Kierkegaard but anyone interested in the philosophy of religion or the ethical aspects of philosophical practice as such

Theorizing Composition Mary Kennedy,1998-06-25 The last 25 years have witnessed extraordinary growth in the academic specialization variously described as composition studies or rhetoric and composition What was noticeable about the field in its infancy was a preoccupation with practice a

lack of emphasis on theory and an exclusive reliance on the writing process As its disciplinary status has grown the field has become far more theoretical Composition studies has expanded its focus reconceptualized the writing process and embraced a wide range of critical perspectives The result of this change is that terms such as poststructuralism social construction gender and genre which were largely unknown in 1965 now dominate discussion This reference book is a guide to the multiplicity of theories that have emerged to form the disciplinary foundation of composition studies The volume consists of 66 entries each of which is written by an expert contributor and focuses on a particular theory or group of theories While the entries show how various individuals have contributed to theoretical movements very few concentrate on the work of a single theorist Each entry first provides a critical summary of a particular theory or group of theories including key elements basic concepts and claims and information about seminal or particularly influential works It then reviews the theory's critical reception in composition studies and discusses its significance in the field The bibliography at the end of each entry lists primary texts and major scholarship related to the theory and provides additional suggestions for further reading The volume closes with a selected bibliography of important works
