Qui Nest Pas Tourna Vers Nous:

Searching for Presence Robert W. Greene, 2022-04-11 Yves Bonnefoy's writings have won him praise not only from readers and critics of French poetry but also thanks to translations into many other languages from readers and critics of poetry far beyond the francophone world. Indeed, Bonnefoy may be the most admired poet to have emerged in France since World War II. Yet his art criticism, dazzling in its scope, possibly as original as his poetry, is yet to receive the attention it deserves. *Searching for Presence: Yves Bonnefoy's Writings on Art* undertakes to fill that lacuna. Elusive, skirting the ineffable, the notion of presence has haunted Bonnefoy for decades. Central to the notion for the poet is the fleeting experience of mutuality between self and other, of lightning transaction in a transient world of a shared mortal destiny; hence a plenitude within finitude. In an age when so many of his contemporaries seem to view any form of art as wallpaper spanning a void, Bonnefoy's faith in presence is all the more welcome. Focusing on his art criticism, the aspect of the poet's oeuvre in which the notion of presence is the most salient, this study tries to do justice to that fidelity.

Postwar Figures of L'ephemere James Petterson, 2000-09 The question of the relationship between aesthetics and history is reconsidered in this study of these postwar poets. Petterson argues that postwar French poetry is a critical poetry encompassing a vast poetic tradition from poets such as Baudelaire and Rimbaud to Francis Ponge and Paul Celan. The author also shows how the critical writings of Hegel, Heidegger, and Ricoeur, among others, suggest that what he calls postwar poetry's will to meaning and its attempt to develop a post-Romantic poetics necessarily questions poetry's ties to philosophical, historical, and political narratives.

Six French Poets of Our Time Robert W. Greene, 2015-03-08 During the last sixty to seventy years, avant-garde poetry in France has evolved in two directions: one toward poetry conceived as a means to an end, the other toward poetry as an end in itself. Focusing on Pierre Reverdy, Francis Ponge, René Char, André du Bouchet, Jacques Dupin, and Marcelin Pleynet as the modern French poets who most faithfully reflect these directions, Robert Greene's chronological study allows us to follow the two-pronged evolution of French poetry since 1910. Situating his argument in a detailed historical context and basing it on comparisons with artistic movements and the poets' own writings on art and on extended analyses of selected representative poems, the author is able to establish a new intellectual-historical perspective on contemporary poetry. Professor Greene finds that whereas Reverdy, Char, du Bouchet, and Dupin all embrace a conception of poetry as quest, as a search for the absolute, as the Way of beauty or truth, Ponge and Pleynet hold to a view of poetry as *j'ete* as a celebration of the relative, as the play and display of language in action. What knits them together, he concludes, is the way in which each poet sums up his era as a stage in the development of twentieth-century French poetry. Eminemment historique, cette poésie fonderait le langage comme véritablement mais cet véritablement ne serait pas assignable en tant que fait positif, il serait un phénomène global la fois sans signe paradoxalement observable et ouvertement efficient. L'œuvre d'André du Bouchet résout des questions initialement poétiques au centre de ce qui constitue le projet global des sciences humaines de créer, fonder, interpréter.

This book finds its origin partly in the International Colloquium on French and Francophone Literature in the 1990s at Dalhousie University, September 1998. Number of the papers since reworked take their place here alongside other studies subsequently invited. They form a broad and varying focused set of cogent and pertinent appraisals of very recent French and francophone poetic practice and its shifting becoming conceptual underpinnings.

Oeuvres philosophiques de Descartes René Descartes, 1839 Étude sur la pensée de Wells Georges Auguste Connes, Georges Auguste Albert Connes, 1926 **Phantasia, conscience d'image, souvenir** Edmund Husserl, 2002. Ce fort volume n° XXIII des œuvres d'Edmund Husserl regroupe sous le titre quelque peu énigmatique de Phantasia, conscience d'image, souvenir, un ensemble de textes posthumes s'étendant sur plus de vingt ans de la fin du XIXe siècle jusqu'au milieu des années vingt. Une telle constance dans le travail des problématiques en cause conforme la méthode phénoménologique même du zigzag montre combien celles-ci ont suffisamment tenu compte des méditations de Husserl pour mobiliser la fois sa prodigieuse capacité d'analyse capable de tailler de majestueuses traverses dans l'extraordinaire profusion des actes de la conscience mais capable aussi de s'garer sur des chemins de traverse et son infatigable courage reprendre nouveaux frais une réflexion qu'il pouvait juger insuffisante ou comme il dit parfois en porte-faux. Le fil rouge des textes ici rassemblés, chacun formant une unité en soi pouvant se lire indépendamment des autres et tout particulièrement celui portant le numéro 1 qui est une partie des Leçons données au cours du semestre d'hiver 1904-1905, consiste tenter de dégager au sein de la classe des représentations la spécificité des représentations intuitives, celles qui font apparaître un objet. Husserl d'une façon générale fait jouer ici les uns par rapport aux autres les faits fondamentaux de la conscience, les types spécifiques de l'

intention les modifications dans les caractères d'actes et les corrélats objectaux des vécus. Ce souci conduit à la recherche d'une architectonique des présentifications intuitives par opposition à la présentation perceptive mais reconduit aussi aux perplexités des analyses de la partie B des Leçons sur la conscience intime du temps Husserliana X et de celles sur des fameux manuscrits de Bernau Husserliana XXXIII. Le cœur des analyses du présent volume se trouve dans l'ouverture de cette prodigieuse boîte de Pandore où se cache la phantasia, lieu tellement inquiétant et révolutionnaire que Husserl ne cessera d'ouvrir et de refermer la boîte tendant assimiler plus ou moins la phantasia à la conscience d'image, apparemment moins perturbante mais connue cependant de façon profondément novatrice. C'est bien là aussi la vocation pionnière de la phénoménologie : explorer l'énigme de la conscience et même lorsque les découvertes s'avèrent vertigineuses, en partager les acquis, quel que soit le risque d'effroi.
