*Proceedings of International Conference on Big Data, Machine Learning and Applications* Ripon Patgiri, Sivaji Bandyopadhyay, Valentina Emilia Balas, 2021-03-22 This book covers selected high quality research papers presented at the International Conference on Big Data Machine Learning and Applications BigDML 2019 It focuses on both theory and applications in the broad areas of big data and machine learning It brings together the academia researchers developers and practitioners from scientific organizations and industry to share and disseminate recent research findings

**Fundamentals of Robust Machine Learning** Resve A. Saleh, Sohaib Majzoub, A. K. Md. Ehsanes Saleh, 2025-04-14 An essential guide for tackling outliers and anomalies in machine learning and data science In recent years machine learning ML has transformed virtually every area of research and technology becoming one of the key tools for data scientists Robust machine learning is a new approach to handling outliers in datasets which is an often overlooked aspect of data science Ignoring outliers can lead to bad business decisions wrong medical diagnoses reaching the wrong conclusions or incorrectly assessing feature importance just to name a few Fundamentals of Robust Machine Learning offers a thorough but accessible overview of this subject by focusing on how to properly handle outliers and anomalies in datasets There are two main approaches described in the book using outlier tolerant ML tools or removing outliers before using conventional tools Balancing theoretical foundations with practical Python code it provides all the necessary skills to enhance the accuracy stability and reliability of ML models Fundamentals of Robust Machine Learning readers will also find A blend of robust statistics and machine learning principles Detailed discussion of a wide range of robust machine learning methodologies from robust clustering regression and classification to neural networks and anomaly detection Python code with immediate application to data science problems Fundamentals of Robust Machine Learning is ideal for undergraduate or graduate students in data science machine learning and related fields as well as for professionals in the field looking to enhance their understanding of building models in the presence of outliers

*Advances in Electrical and Computer Technologies* Thangapraakash Sengodan, Sanjay Misra, Murugappan M, 2025-07-04 This book comprises a selection of papers presented at the Sixth International Conference on Advances in Electrical and Computer Technologies ICAECT 2024 It compiles groundbreaking research and advancements in the field of electrical engineering electronics engineering computer engineering and communication technologies The book touches upon a wide array of topics including smart grids soft computing techniques in power systems smart energy management systems and

power electronics under the Electrical Engineering track and biomedical engineering antennas and waveguides image and signal processing and broad band and mobile communication under the Electronics Engineering track With special emphasis on Computer Engineering this book highlights emerging trends in computer vision pattern recognition cloud computing pervasive computing intelligent systems artificial intelligence neural network and fuzzy logic machine learning deep learning data science video processing and wireless communication This is a valuable resource for students researchers and engineers within the field of innovative research and practical applications of electrical and computer technologies

**Innovations and Dynamics in Photonics and Electronics** Vijaya Katti,Milind Pande,Pravin Jadhav,Aavishkar Katti,2025-03-30 The fields of photonics and electronics are at the heart of technological innovation driving progress across industries and shaping the future of human connectivity automation and sustainability The book is a comprehensive exploration of the critical developments economic strategies and cutting edge technologies revolutionizing these domains This book delves into India s unique position in the global electronics landscape emphasizing its export strength and comparative advantages It examines the dynamic role of investments economic models and incentives in building self reliance and boosting domestic manufacturing The importance of supply chain management in fostering technological growth is discussed along with the transformative potential of adopting circular economy principles for sustainability The book also explores the synergy between photonics electronics and artificial intelligence highlighting advancements in machine learning that are redefining possibilities in the field From optimizing manufacturing processes to harnessing AI driven solutions this book offers insights into how technology is reshaping the world of electronics and photonics Whether you are an academic a policymaker an industry professional or a student of technology and innovation this book provides a rich foundation for understanding the dynamic forces shaping the future of photonics and electronics in India and beyond

*Text Entry Systems* I. Scott MacKenzie, Kumiko Tanaka-Ishii, 2010-07-28 Text Entry Systems covers different aspects of text entry systems and offers prospective researchers and developers global guidelines for conducting research on text entry in terms of design strategy evaluation methodology and requirements a discussion of the history and current state of the art of entry systems and specific guidelines for designing entry systems for a specific target depending on devices modalities language and different physical conditions of users Text entry has never been so important as it is today This is in large part due to the phenomenal relatively recent success of mobile computing text messaging on mobile phones and the proliferation of small devices like the Blackberry and Palm Pilot Compared with the recent past when text entry was primarily through the standard qwerty keyboard people today use a diverse array of devices with the number and variety of such devices ever increasing The variety is not just in the devices but also in the technologies used entry modalities have become more varied and include speech

recognition and synthesis handwriting recognition and even eye tracking using image processing on web cams Statistical language modeling has advanced greatly in the past ten years and so therein is potential to facilitate and improve text entry increasingly the way people communicate This book covers different aspects of text entry systems and offers prospective researchers and developers Global guidelines for conducting research on text entry in terms of design strategy evaluation methodology and requirements History and current state of the art of entry systems including coverage of recent research topics Specific guidelines for designing entry systems for a specific target depending on devices modalities language and different physical conditions of users

**International Handbook of E-Learning Volume 1** Badrul H. Khan, Mohamed Ally, 2015-02-20 The International Handbook of e Learning Volume 1 provides a comprehensive compendium of research and theory in all aspects of e learning one of the most significant ongoing global developments in the entire field of education Covering history design models instructional strategies best practices competencies evaluation assessment and more these twenty seven contributions tackle the tremendous potential and flexibility inherent to this rapidly growing new paradigm Past and present empirical research frames each chapter while future research needs are discussed in relation to both confirmed practice and recent changes in the field The book will be of interest to anyone seeking to create and sustain meaningful supportive learning environments within today s anytime anywhere framework from teachers administrators and policy makers to corporate and government trainers *Monthly Catalog of United States Government Publications* ,1984

**Process Modeling and Optimization in Modern Manufacturing** Ravi Pratap Singh, Narendra Kumar, Vishal Francis, Ankur Jaiswal, 2025-10-23 This book covers modeling and optimization of various modern manufacturing processes such as advanced machining hybrid manufacturing and additive manufacturing including related case studies in these domains Various areas like smart manufacturing hybrid manufacturing 3D printing process modeling and characterization optimization and so forth are covered in detail The focus of this book is on artificial neural network finite element analysis firefly genetic algorithm particle swarm and fuzzy based techniques which are the main optimization and modeling techniques Features of the book Provides in depth investigations on prospects of modeling and optimization of modern manufacturing processes Detailed overview on different evolutionary and bio inspired optimization techniques and their implementation Provides step by step guidance on how to use machine learning for the enhancement of productivity and quality in modern manufacturing processes Discusses sustainability and Industry 4.0 based content Includes case studies and practical examples This book is aimed at researchers and graduate students in mechanical manufacturing production and industrial engineering

**Blockchain for Big Data** Shaoliang Peng, 2021-08-27 In recent years the fast paced development of social information and networks has led to the explosive growth of data A variety of big data have emerged encouraging researchers to make business decisions by analysing this data However many challenges remain especially concerning data security and privacy Big data security and privacy threats permeate every link of the big data industry chain such as data

production collection processing and sharing and the causes of risk are complex and interwoven Blockchain technology has been highly praised and recognised for its decentralised infrastructure anonymity security and other characteristics and it will change the way we access and share information In this book the author demonstrates how blockchain technology can overcome some limitations in big data technology and can promote the development of big data while also helping to overcome security and privacy challenges The author investigates research into and the application of blockchain technology in the field of big data and assesses the attendant advantages and challenges while discussing the possible future directions of the convergence of blockchain and big data After mastering concepts and technologies introduced in this work readers will be able to understand the technical evolution similarities and differences between blockchain and big data technology allowing them to further apply it in their development and research Author Shaoliang Peng is the Executive Director and Professor of the College of Computer Science and Electronic Engineering National Supercomputing Centre of Hunan University Changsha China His research interests are high performance computing bioinformatics big data AI and blockchain
