The History of Mongolia (3 Vols.) David Sneath, Christopher Kaplonski, 2010-05-01. A significant aspect of this work is the emphasis on source materials including some translated from Mongolian and other languages for the first time. The source materials and other articles are all fully contextualized and situated by introductory material by the volume's editors. This is the first work in English to bring together significant articles in Mongolian studies in one place which will be widely welcomed by scholars and researchers in this field. This essential reference in two volumes includes works by noted scholars including Charles Bawden, Igor de Rachewiltz, David Morgan, Owen Lattimore, and Caroline Humphrey. It also includes excerpts from translations of source documents such as the works of Rashid al-Din, *The Secret History of the Mongols*, and the Yuan Shih. In addition, more recent historical periods are covered with material such as Batmonh's speech that heralded Mongolia's versions of glasnost and perestroika, as well as Baabar's *Buu Mart*, a key work associated with the Democratic Revolution of 1990.

International Competition in China, 1899-1991 Bruce A. Elleman, 2015-04-10. China's recent economic reforms have opened its economy to the world. This policy, however, is not new. In the late nineteenth century, the United States put forward the Open Door Policy as a counter to European exclusive spheres of influence in China. This book, based on extensive original archival research, examines and re-evaluates China's Open Door Policy. It considers the policy from its inception in 1899 right through to the post-1978 reforms. It relates these changes to the various shifts in China's international relations, discusses how decades of foreign invasion, civil war, and revolution followed the destruction of the policy in the 1920s, and considers how the policy, when applied in Taiwan after 1949 and by Deng Xiaoping in mainland China after 1978, was instrumental in bringing about respectively Taiwan's economic miracle and mainland China's recent economic boom. The book argues that although the policy was characterised as United States economic imperialism during the Cold War, in reality it helped China retain its sovereignty and territorial integrity.

Recognition in International Law Stefan Talmon, 2021-10-18. The bibliography lists the literature and State practice on the question of recognition in international law for the last two hundred years. It contains books and articles, i.e. contributions to journals and other collected works such as *Festschriften* and *Encyclopaedias*, as well as published and unpublished theses, pamphlets, compilations of diplomatic documents, and case notes. As many of the monographs on recognition in international law will not be available in all libraries, book reviews have been included in the bibliography in order to enable the user to decide whether it may be advisable to order a certain work by inter-library loan. Its 4,500 entries are arranged systematically according to subject categories in fourteen main sections. Each main section is further subdivided with ever-increasing specificity into sub-sections on codification, codification attempts, general studies,

studies of certain recognition questions and studies of specific recognition cases The bibliography employs a broad meaning of recognition It is not restricted to the question of status of an authority or entity in international law but encompasses also the question of relations with it As many of the recognition cases must be considered and can only be understood against their historic political and sometimes even economic background the bibliography includes not only purely legal treaties but also publications of a primarily historical political or economic content which incidentally deal with aspects of recognition in international law This is reflected by the titles of the 730 journals from more than 50 countries in 20 different languages which have been used to compile the bibliography The bibliography contains both an author and a comprehensive subject index to enable users to locate works of a particular writer or a specific problem

Mongolia in the Twentieth Century Stephen Kotkin, Bruce Allen Elleman, 2015-02-12 The remote vastness of Mongolia has remained somewhat of a mystery to most Westerners no less so in the 20th century Homeland of the legendary conqueror Chingiz Khan in modern times Mongolia itself has been the object of imperial rivalry For most of the 20th century it was under Soviet domination Mikhail Gorbachev began the withdrawal of Soviet troops from Mongolia in 1989 a process completed in 1992 By 1996 a coalition of opposition parties triumphed in national elections and Mongolia launched itself on a new course It is perhaps the most intriguing of the post community transition societies This volume examines Mongol history over the past century embracing not only Mongolia proper but also Mongol communities in Russia and China Contributions based on new archival research and the latest fieldwork are from the world's top experts in the field including four authors from Mongolia and others from Japan Russia Taiwan Great Britain and the United States Stephen Kotkin's introductory chapter is an overview of Mongol studies The essays in part 1 examine Sino Russian competition over Outer Mongolia Part 2 looks at international diplomacy in Mongolia including the role of Japan Part 3 focuses on contemporary issues ranging from economic and cultural change to emergent elites A concluding essay surveys Mongolian foreign policy

The Modernization of Inner Asia Cyril E. Black, Louis Dupree, Elizabeth Endicott-West, Daniel C. Matuszewski, Eden Naby, Arthur N. Waldron, 2016-09-16 Inner Asia in premodern times the little known land of nomads and semi nomads has moved to the world's front page in the 20th century as the complex struggles for the future of Afghanistan Soviet Central Asia Tibet and other territories make clear But because Inner Asia as a whole is divided among several states politically and among area specialists academically broad perspectives on recent events are difficult to find This work treats the region as a single unit providing both an account of the region's past and an analysis of its present and its prospects in a thematic rather than a strictly country by country manner

Recast All Under Heaven Xiaoyuan Liu, 2010-08-12 Xiaoyuan Liu has provided a most compelling study of frontier in the shaping of modern China's territorial

identity Ethnopolitics usually confined to the domestic sphere must now be recast and brought to the forefront of any attempt to understand China's international relations and vice versa Uradyn E Bulag University of Cambridge UK In this collection of well argued essays Professor Xiaoyuan Liu offers an extremely valuable perspective on the evolution of China's geo body in the nineteenth and twentieth centuries that is its evolution from an empire to a modern nation state This complex process involved a constant effort to reconcile the unifying impulses of the central government with the vibrant ethnic particularism that existed within China's constantly shifting borders Richard J Smith George and Nancy Rupp Professor of Humanities and Professor of History Rice University USA In this illuminating set of essays Liu Xiaoyuan the master of China's frontier history and ethnopolitics ranges widely across the boundaries of space and time to examine how modern China came into being By emphasizing the seemingly paradoxical centrality of the periphery in the consolidation and legitimation of Chinese political authority Liu explains Beijing's concern about trouble on its Inner Asian frontiers and expands our understanding of China's modern history Steven I Levine Senior Research Associate Maureen and Mike Mansfield Center University of Montana USA In applying the two interpretative themes of frontier and ethnicity Recast All Under Heaven examines the externalization from and internalization to China by a number of the tributary affiliates and outlying territories of the by gone Qing Empire This unique book blends analyses of domestic and international developments involved in China's modern reincarnation and provides an integral narrative that links historical themes pertinent to the eastern and western halves of China This is the first study contending that frontier China has remained a fitting characterization of the rising Asian giant

Russia but they all have their own internal logic and are not simply puppets in the hands of a powerful patron The book provides detailed case studies and draws out general patterns and compares present day de facto states with de facto states which existed in the past
