**In the Middle of the Fight** David Eugene Johnson, Adam Grissom, Olga Olikier, 2008 This monograph presents a qualitative assessment of the performance of medium armored forces in 13 past conflicts that span the range of military operations The accompanying analysis is designed to help inform U S Army decisions about fielding medium armored forces in the future The case histories yielded three major insights First medium armored forces fare poorly against competent heavily armored opponents This finding will prove relevant to the U S Army s medium armored forces if their survivability and lethality do not live up to expectations or cannot be fully realized in battlefield conditions Second doctrinal and organizational steps can in certain circumstances mitigate medium armor s liabilities These steps include the implementation of high quality combined arms tactics down to the lowest echelons the effective application of supporting firepower and training for crews and junior leaders Finally the U S Army has lacked a forced entry armor capability since the retirement of the M551 Sheridan Neither the Stryker vehicle nor the Future Combat Systems as currently envisioned can fill that critical void The authors conclude that it would be prudent for the U S Army to maintain a mix of heavy medium armored and light forces that can be task organized and employed in conditions that best match their attributes Medium armored forces have much to offer in such a mix provided by publisher

[The Hall of Mirrors](#) Jim Storr, 2019-05-09 The military scholar and author of *The Human Face of War* analyses the nature of 20th century war and warfare in this wide ranging study The 20th Century was possibly the most violent and turbulent century in history The wars waged in those ten decades reshaped the globe and wreaked an incalculable toll on human life In *The Hall of Mirrors* military analyst and historian Jim Storr explores what can we learn from war and warfare in the 20th century Rather than presenting a narrative history *The Hall of Mirrors* takes a deep look at the nature of 20th Century war and warfare Storr looks at the strategy operational art and tactics employed He analyzes how technology developed and how those technologies affected military events He also considers the effect of individual human beings and organizations By 1919 the First World War was already over Millions had died empires had crumbled new nations had been born And yet the so called Great War was merely setting the stage for another eighty years of crisis conflict and change of

alliances forged and broken of apparent chaos that can appear futile and yet has enormous consequence **SOVIET ARMoured FORCE** , **Tanks and Armored Vehicles** Bruce LaFontaine,2013-06-19 44 illustrations of the Little Willie 1915 Rolls Royce armored scout car 1916 German Panzer III 1940 American M4 Sherman tank 1942 more Captions

**Storming the City** Alec Wahlman,2015-10-15 In an increasingly urbanized world urban terrain has become a greater factor in military operations Simultaneously advances in military technology have given military forces sharply increased capabilities The conflict comes from how urban terrain can negate or degrade many of those increased capabilities What happens when advanced weapons are used in a close range urban fight with an abundance of cover Storming the City explores these issues by analyzing the performance of the US Army and US Marine Corps in urban combat in four major urban battles of the mid twentieth century Aachen 1944 Manila 1945 Seoul 1950 and Hue 1968 Alec Wahlman assesses each battle using a similar framework of capability categories and separate chapters address urban warfare in American military thought In the four battles across a wide range of conditions American forces were ultimately successful in capturing each city because of two factors transferable competence and battlefield adaptation The preparations US forces made for warfare writ large proved generally applicable to urban warfare Battlefield adaptation a strong suit of American forces filled in where those overall preparations for combat needed fine tuning From World War Two to Vietnam however there was a gradual reduction in tactical performance in the four battles *Mobility, shock, and firepower: The Emergence of the U.S. Army's Armor Branch, 1917-1945* Robert S. Cameron, The following pages provide a narrative analysis of the U S Army s development of armored organizations and their related doctrine materiel and training activities in the period 1917 1945 The development of new armor doctrines and organizations to exploit emerging technologies concepts and missions is the heart of this work How that transition was accomplished during the brief space of about twenty years the accepted duration of a single generation is a story worthy of careful examination as our Army gropes with managing similar transformations today
