Daly, 1991-06-18 Focusing on the Black Sea fleet between 1827-1841 this book assesses Russia's naval strength against other Mediterranean powers especially the Ottoman Empire arguing their limitations came from geographic political and economic considerations Primary and secondary sources are utilized      **Twenty-First Century Seapower** Peter Dutton, Robert Ross, Øystein Tunsjø, 2013-05-02 This book offers an assessment of the naval policies of emerging naval powers and the implications for maritime security relations and the global maritime order Since the end of the Cold War China Japan India and Russia have begun to challenge the status quo with the acquisition of advanced naval capabilities The emergence of rising naval powers is a cause for concern as the potential for great power instability is exacerbated by the multiple maritime territorial disputes among new and established naval powers This work explores the underlying sources of maritime ambition through an analysis of various historical cases of naval expansionism It analyses both the sources and dynamics of international naval competition and looks at the ways in which maritime stability and the widespread benefits of international commerce and maritime resource extraction can be sustained through the twenty first century This book will be of much interest to students of naval power Asian security and politics strategic studies security studies and IR in general      Seapower Geoffrey Till, 2009-03-06 This revised updated and expanded new edition of Geoffrey Till's acclaimed textbook provides an invaluable guide for anyone interested in the changing and crucial role of seapower in the twenty first century      The Sea Power of the State S.G. Gorshkov, 2013-10-22 Admiral Gorshkov has transformed the Soviet fleet into a world sea power for the first time in Russian history He is Russia's most brilliant naval strategist of all time He has created the modern Soviet navy His book

examines the main components of sea power among which attention is focused on the naval fleet of the present day capable of conducting operations and solving strategic tasks in different regions of the world's oceans together with other branches of the armed forces and independently      *Seapower States* Andrew Lambert, 2018-11-27 A fascinating geopolitical chronicle. A superb survey of the perennial opportunities and risks in what Herman Melville called the watery part of the world. The Wall Street Journal. In this volume one of the most eminent historians of our age investigates the extraordinary success of five small maritime states. Andrew Lambert, author of *The Challenge Britain Against America in the Naval War of 1812*, winner of the prestigious Anderson Medal, turns his attention to Athens, Carthage, Venice, the Dutch Republic, and Britain, examining how their identities as seapowers informed their actions and enabled them to achieve success disproportionate to their size. Lambert demonstrates how creating maritime identities made these states more dynamic, open, and inclusive than their lumbering continental rivals. Only when they forgot this aspect of their identity did these nations begin to decline. Recognizing that the United States and China are modern naval powers rather than seapowers is essential to understanding current affairs as well as the long-term trends in world history. This volume is a highly original, big-think analysis of five states whose success and eventual failure is a subject of enduring interest by a scholar at the top of his game. An intriguing series of stories of communities thinking seriously about how to stand their own ground when outpowered, how to do so in ways that are consistent with their values, and sometimes how to negotiate the descent from being a great power when the cards just aren't in their favor any more. These are timely questions. *Times Higher Education Supplement*. Lambert is without a doubt the most insightful naval historian writing today. *The Times*.
