Russian Studies Of Japan An Exploratory Survey:

Russian Studies of Japan E Stuart Kirby,1981-05-21 Rediscovering Russia in Asia Stephen Kotkin,David Wolff,2015-03-04 This work presents a trans Siberian expedition to rediscover the peoples cultures and riches of Russia s eastern frontiers It addresses such questions as who are the people of the region have they a distinct culture and does the area have a future as part of the Pacific Rim Fascism Federico Marcon,2025-06-06 A wide ranging history of the term fascism what it has meant and what it means today The rise and popular support for authoritarianism around the world and within traditional democracies have spurred debates over the meaning of the term fascist and when and whether it is appropriate to use it The landmark study *Fascism The History of a Word* takes this debate further by tackling its most fundamental questions How did the terms fascism and fascist come to be in the first place How and in what circumstances have they been used How can they be understood today And what are the advantages or disadvantages of using fascism to make sense of interwar authoritarianism as well as contemporary politics Exploring the writings and deeds of political leaders activists artists authors and philosophers Federico Marcon traces the history of the term s use and usefulness in relation to Mussolini s political regime antifascist resistance and the quest of postwar historians to develop a definition of a fascist minimum This investigation of the semiotics of fascism also aims to inquire about people s voluntary renunciation of the modern emancipatory ideals of freedom equality and solidarity *The Russian Impact on Japan* Shomu Nobori,Katsumaro Akamatsu,1981 **Area Bibliography of Japan** Ria Koopmans-de Bruijn,1998 Provides a general overview of literature relating to Japan and covers a broad range of subject matter from art feminism and linguistics to corporate culture history and medicine Includes books published since 1980 that are related to the geographical area of Japan and to Japanese culture within that area *Othernesses of Japan* Harumi Befu,Josef Kreiner,1992 *Kodansha Encyclopedia of Japan* ,1983 日本国史学大辞典 : 第51巻-61巻 (Japan),1992 *Ethnic Forum* ,1982 *Organization and Development of Russian Business* Tatiana Dolgopyatova,Ichiro Iwasaki,Andrei A. Yakovlev,2009-07-16 This book is designed to scrutinize the Russian business sector in transition with special attention to firm organization business integration corporate governance and company management Using a unique dataset of Russian joint stock companies the authors empirically analyze key issues for understanding the Russian corporate sector *External Research* ,1964 *External Research List* ,1967 **External Research. ER List** United States. Department of State. External Research Division,1967 **Energy Research Abstracts** ,1995 *Pathways to Exploration* National Research Council,Division of Behavioral and Social Sciences and Education,Committee on National Statistics,Division on Engineering and Physical Sciences,Space Studies Board,Aeronautics and Space Engineering Board,Committee on Human Spaceflight,2014-09-30 The United States has publicly funded its human spaceflight program on a continuous basis for more than a half century through three wars and a half dozen recessions from the early Mercury and Gemini suborbital and Earth

orbital missions to the lunar landings and thence to the first reusable winged crewed spaceplane that the United States operated for three decades Today the United States is the major partner in a massive orbital facility the International Space Station that is becoming the focal point for the first tentative steps in commercial cargo and crewed orbital space flights And yet the long term future of human spaceflight beyond this project is unclear Pronouncements by multiple presidents of bold new ventures by Americans to the Moon to Mars and to an asteroid in its native orbit have not been matched by the same commitment that accompanied President Kennedy's now fabled 1961 speech namely the substantial increase in NASA funding needed to make it happen Are we still committed to advancing human spaceflight What should a long term goal be and what does the United States need to do to achieve it Pathways to Exploration explores the case for advancing this endeavor drawing on the history of rationales for human spaceflight examining the attitudes of stakeholders and the public and carefully assessing the technical and fiscal realities This report recommends maintaining the long term focus on Mars as the horizon goal for human space exploration With this goal in mind the report considers funding levels necessary to maintain a robust tempo of execution current research and exploration projects and the time resources needed to continue them and international cooperation that could contribute to the achievement of spaceflight to Mars According to Pathways to Exploration a successful U S program would require sustained national commitment and a budget that increases by more than the rate of inflation In reviving a U S human exploration program capable of answering the enduring questions about humanity's destiny beyond our tiny blue planet the nation will need to grapple with the attitudinal and fiscal realities of the nation today while staying true to a small but crucial set of fundamental principles for the conduct of exploration of the endless frontier The recommendations of Pathways to Exploration provide a clear map toward a human spaceflight program that inspires students and citizens by furthering human exploration and discovery while taking into account the long term commitment necessary to achieve this goal

A Field Manual of Magnetotelluric (MT) Surveys with Case Studies for Earth Scientists and Engineers O. P. Mishra, D. C. Naskar, 2025-07-25 This book details both conventional and advanced geophysical techniques with description of the Electromagnetic EM based physics involved in different methodologies of magnetotellurics MT It offers detailed discussions of the theory of EM and MT methods and the operation of specific instruments including the presentation of results and their interpretation in tabular format The chapters describe the conceptual background of MT geophysical methods along with the related instrumentation sufficient illustrations and the applicability of the individual methodologies supported by successful case histories Features Provides a comprehensive introduction to the MT geophysical method Covers diverse geotectonic settings with several case studies supported by diagrams and data tables Describes the fundamentals of uncontrollable telluric and controllable non telluric sources used in MT surveys Reviews MT methods with emphasis on recent improvements recognizing both static and distortion effects and their treatment in the analysis of impedance tensors in 3 D inversion codes Explores integrated MT interpretation coupled

with seismic and potential gravity magnetic geophysical methods This book is aimed at professionals students and researchers in geophysics geology civil mechanical petroleum and geothermal engineering and other branches of earth and environmental sciences Psychology of Space Exploration: Contemporary Research in Historical Perspective Douglas A. Vakoch, National Aeronautics and Space Administration, 2011-07-06 This book explores some of the contributions of psychology to yesterday's great space race today's orbiter and International Space Station missions and tomorrow's journeys beyond Earth's orbit It provides an analysis of the challenges facing future space explorers while at the same time presenting new empirical research on topics ranging from simulation studies of commercial spaceflights to the psychological benefits of viewing Earth from space *China-Russia Security Relations : Strategic Parallelism Without Partnership Or Passion?* Richard Weitz, 2008 Recapturing a Future for Space Exploration National Research Council, Division on Engineering and Physical Sciences, Aeronautics and Space Engineering Board, Space Studies Board, Committee for the Decadal Survey on Biological and Physical Sciences in Space, 2012-01-30 More than four decades have passed since a human first set foot on the Moon Great strides have been made in our understanding of what is required to support an enduring human presence in space as evidenced by progressively more advanced orbiting human outposts culminating in the current International Space Station ISS However of the more than 500 humans who have so far ventured into space most have gone only as far as near Earth orbit and none have traveled beyond the orbit of the Moon Achieving humans further progress into the solar system had proved far more difficult than imagined in the heady days of the Apollo missions but the potential rewards remain substantial During its more than 50 year history NASA's success in human space exploration has depended on the agency's ability to effectively address a wide range of biomedical engineering physical science and related obstacles an achievement made possible by NASA's strong and productive commitments to life and physical sciences research for human space exploration and by its use of human space exploration infrastructures for scientific discovery The Committee for the Decadal Survey of Biological and Physical Sciences acknowledges the many achievements of NASA which are all the more remarkable given budgetary challenges and changing directions within the agency In the past decade however a consequence of those challenges has been a life and physical sciences research program that was dramatically reduced in both scale and scope with the result that the agency is poorly positioned to take full advantage of the scientific opportunities offered by the now fully equipped and staffed ISS laboratory or to effectively pursue the scientific research needed to support the development of advanced human exploration capabilities Although its review has left it deeply concerned about the current state of NASA's life and physical sciences research the Committee for the Decadal Survey on Biological and Physical Sciences in Space is nevertheless convinced that a focused science and engineering program can achieve successes that will bring the space community the U S public and policymakers to an understanding that we are ready for the next significant phase of human space exploration The goal of this report is to lay out steps and develop a forward looking portfolio of research that will

provide the basis for recapturing the excitement and value of human spaceflight thereby enabling the U S space program to deliver on new exploration initiatives that serve the nation excite the public and place the United States again at the forefront of space exploration for the global good *Handbook of Research on International Collaboration, Economic Development, and Sustainability in the Arctic* Erokhin, Vasilii, Gao, Tianming, Zhang, Xiuhua, 2018-12-28 Global interest in the exploration of the Arctic has been growing rapidly As the Arctic becomes a global resource base and trade corridor between the continents it is crucial to identify the dangers that such a boom of extractive industries and transport routes may bring on the people and the environment The Handbook of Research on International Collaboration Economic Development and Sustainability in the Arctic discusses the perspectives and major challenges of the investment collaboration and development and commercial use of trade routes in the Arctic Featuring research on topics such as agricultural production environmental resources and investment collaboration this book is ideally designed for policymakers business leaders and environmental researchers seeking coverage on new practices and solutions in the sphere of achieving sustainability in economic exploration of the Arctic region
