Davis,2008 With a foreword by Geoffrey Robertson QC The issues of terror and terrorism confront us every day every time we board a flight pick up a newspaper or watch television Concerns about terrorism now dictate domestic and foreign policies around the world In a very real sense one way or another we find ourselves in the grip of terror But what is terror How is it described measured and experienced Is the current terrorist threat unprecedented The answers to many of these questions and the lessons therein are to be found in history and nowhere more so than in Europe In fact Europe has been home to some of the most terrifying and horrific events in recorded human history This collection takes a broad ranging yet detailed look at the landmark events and epochs of terror across Europe from the Gunpowder Plot of 1605 to the terrorist bombings on the London Underground in July 2005 Drawing on leading authorities from across the globe this volume explores the historical mutation of political violence and concepts of terror Terror will be of interest to scholars of history international relations and political science to policy makers and to the educated layperson **The Catholic Church and Russia** Dennis J. Dunn,2017-05-15 This unique account of Russia's encounter with Catholicism from the medieval period to the present provides fascinating insights into Catholic Russian relations Dennis Dunn analyzes religious politics in the former USSR and in Russia particularly in areas where relations between the state backed Orthodox establishment and the Catholic Church have renewed debates about civil rights religious freedom and Russian national identity under Vladimir Putin's regime Discussing issues such as the role of Pope John Paul II in helping to bring down the Iron Curtain Dunn argues provocatively

that Catholic Russian relations are a microcosm of Western Russian relations and sheds new light on the historical strain between Russia and the West Showing how Russia's adoption of a secular ideology a vain attempt to surpass the West alienated the Russian government not only from the Catholic Church but also from its own Orthodox foundation this book discusses how Russia sealed its fate while precipitating the Cold War with the West Students and general readers interested in Russian history Western Russian relations Catholicism and comparative religion more broadly will find this an invaluable and accessible account of an important and understudied subject

By Honor Bound Nancy Shields Kollmann, 1999 In the sixteenth and seventeenth centuries Russians from all ranks of society were bound together by a culture of honor Here one of the foremost scholars of early modern Russia explores the intricate and highly stylized codes that made up this culture Nancy Shields Kollmann describes how these codes were manipulated to construct identity and enforce social norms and also to defend against insults to pursue vendettas and to unsettle communities She offers evidence for a new view of the relationship of state and society in the Russian empire and her richly comparative approach enhances knowledge of statebuilding in premodern Europe By presenting Muscovite state and society in the context of medieval and early modern Europe she exposes similarities that blur long standing distinctions between Russian and European history Through the prism of honor Kollmann examines the interaction of the Russian state and its people in regulating social relations and defining an individual's rank She finds vital information in a collection of transcripts of legal suits brought by elites and peasants alike to avenge insult to honor The cases make clear the conservative role honor played in society as well as the ability of men and women to employ this body of ideas to address their relations with one another and with the state Kollmann demonstrates that the grand princes and later the tsars tolerated a surprising degree of local autonomy throughout their rapidly expanding realm Her work marks a stark contrast with traditional Russian historiography which exaggerates the power of the state and downplays the volition of society

Physiologic Autoimmunity and Preventive Medicine Alexander B. Poletaev, 2013-06-03 The immune system is a natural component regulator and direct participant in the physiological activities in a healthy body A considerable number of immune functions including those related to antimicrobial defense derive from autoclearance as well as construction and support of multicellularity Various pathological processes in any organ are usually accompanied by different patterns of cell death and thus by increased exposure and presentation of self antigens These events induce the secondary rise in production of autoantibodies with appropriate specificity opsonins which provides augmentation of clearance by facilitating the efficacy of macrophage dependent consumption of debris in the affected organ Secondary changes in production and serum content of autoantibodies can be considered the universal and earliest detectable marker of any chronic disease Experimental and

clinical production antibodies reveal antibodies against nuclear antigens which penetrate into living cell nuclei and alter nuclear acid synthesis cell proliferation and function Autoantibodies can thus be regarded as hormone like bioregulators of gene expression The immune system is apparently able to reproduce complementary regulators for various cell receptors including nuclear ones The book focuses on physiological autoimmunity models and delves into the relation between autoimmunity and autoallergy in the context of disease prevention and prediction The E book is a unique and comprehensive monograph and includes a history and contemporary research on natural autoimmunity a fundamental concept essential for many branches of medicine and pathology The concepts described in this e book also have broad practical implications for the healthcare sector because it establishes effective method of early prediction for many different diseases and creates a basis for prophylaxis The reference gives medical and clinical professionals a chance to revisit old dogmas and acquire fruitful perspectives for theoretical reasoning and research planning
