**Urban Forestry and Arboriculture in Malaysia**

Sreetheran Maruthaveeran, Wendy Y. Chen, Justin Morgenroth, 2022-11-29 This book represents the latest research on urban forestry in a Malaysian context It demonstrates that urban forestry is concerned not only with environmental enhancement but also other aspects such as recreation health and well being and government policies This edited collection provides a comprehensive overview of urban forestry studies from various researchers in Malaysia and includes rich historical perspectives of urban forestry in the country It also tackles related issues in policy The greening of urban Malaysia in the 1970s focused primarily on beautification and was primarily the province of horticulturists landscapers nursery workers town planners and architects with negligible inputs from foresters particularly urban foresters Perhaps for that reason the term landscaping has been used more widely than urban forestry by government and private institutions politicians stakeholders academicians and the public Nevertheless the authors show that the concept of urban forestry is not new for developing countries such as Malaysia where urbanization is increasing at a rapid rate The book unpacks this demographic shift from a predominantly rural to a principally urban society As the only unified body of work on urban forestry and arboricultural studies in Malaysia this volume presents an important interdisciplinary reference for students researchers and scholars in

physical geography forestry and urban forestry arboriculture and landscape architecture both in Malaysia and in other developing urbanizing countries particularly in Southeast Asia It is also an important resource for those working in environmental policy and practice excavating the vital connection between the environment and well being
