A Study of Numbers R. A. Schwaller de Lubicz, 1986-10-01 We lack direct consciousness of Space and Time We can know of them only indirectly by mass force and energy and by the intermediary of phenomena such as may be tested by our five senses Without direct awareness of Space or Time human beings lack two senses necessary for the knowledge of all causes From this imperfection of which we are always being made aware is born our need to simplify Thus we reduce everything to fundamental properties without paying any attention to the underlying universal organization the effects of which are all around us The result is that the science of numbers the most wonderful guide to the constant creation of the universe remains an enormous hypothesis so long as its use has not awakened in us the higher consciousness of a universal order By deepened knowledge of things and their process of becoming we must come to recognize Numbers as a truth and to experience with our senses the living relation of a cause to an effect this relation being truer and more real than the effect could ever be Published in 1917 under the author s given name of Ren Schwaller A Study of Numbers is the first expression of the teachings we have come to associate with his later and better known name R A Schwaller de Lubicz It is a masterly account of the living universal qualitative and casual reality of numbers Starting from the
