**Back to the Garden** James H. S. McGregor, 2015-02-10 The garden was the cultural foundation of the early Mediterranean peoples they acknowledged their reliance on and kinship to the land and they understood nature through the lens of their diversely

cultivated landscape Their image of the garden underwrote the biblical book of Genesis and the region's three major religions In this important melding of cultural and ecological histories James H S McGregor suggests that the environmental crisis the world faces today is a result of Western society's abandonment of the First Nature principle of the harmonious interrelationship of human communities and the natural world The author demonstrates how this relationship which persisted for millennia effectively came to an end in the late eighteenth century when nature came to be equated with untamed landscape devoid of human intervention McGregor's essential work offers a new understanding of environmental accountability while proposing that recovering the original vision of ourselves not as antagonists of nature but as cultivators of a biological world to which we innately belong is possible through proven techniques of the past
