Burgers Bob Kreigel, Robert J. Kriegel, David Brandt, 1996-01-01 Outmoded beliefs practices and processes why do so many business people cling to their established ways as if their lives depended on them When they live in an era characterized by an unprecedented rate of change When the very things they refuse to give up the sacred cows of the business world are the lodestones that will kill their careers and block their companies path to success In this insightful and unique guide Kriegel and Brandt reveal why people hold on to the old and how to inspire them to bring on the new to the point where they re enthusiastically turning even their favorite sacred cows into burgers Tackling one of the most important business issues of today the authors demonstrate why the latest panaceas reengineering virtual teams outsourcing reinventing restructuring downsizing almost always prove unsuccessful They expose how these buzzword programs overlook the most fundamental element of all business people After all people are the gatekeepers of change with the power to breathe life into a new program or kill it If they re excited and positive it's open sesame if they re resistant they ll slam the door in your face Getting to the heart of the matter Kriegel and Brandt show you how to coach yourself and others to create Change Ready people

Weird Ideas That Work Robert I. Sutton, 2002-03-02 A breakthrough in management thinking weird ideas can help every organization achieve a balance between sustaining performance and fostering new ideas To succeed you need to be both conventional and counterintuitive Creativity new ideas innovation in any age they are keys to success Yet as Stanford

professor Robert Sutton explains the standard rules of business behavior and management are precisely the opposite of what it takes to build an innovative company We are told to hire people who will fit in to train them extensively and to work to instill a corporate culture in every employee In fact in order to foster creativity we should hire misfits goad them to fight and pay them to defy convention and undermine the prevailing culture Weird Ideas That Work codifies these and other proven counterintuitive ideas to help you turn your workplace from staid and safe to wild and woolly and creative In Weird Ideas That Work Sutton draws on extensive research in behavioral psychology to explain how innovation can be fostered in hiring managing and motivating people building teams making decisions and interacting with outsiders Business practices like hire people who make you uncomfortable and reward success and failure but punish inaction strike many managers as strange or even downright wrong Yet Weird Ideas That Work shows how some of the best teams and companies use these and other counterintuitive practices to crank out new ideas and it demonstrates that every company can reap sales and profits from such creativity Weird Ideas That Work is filled with examples drawn from hi and low tech industries manufacturing and services information and products More than just a set of bizarre suggestions it represents a breakthrough in management thinking Sutton shows that the practices we need to sustain performance are in constant tension with those that foster new ideas The trick is to choose the right balance between conventional and weird and now thanks to Robert Sutton s work we have the tools we need to do so

Guide to Organisation Design Naomi Stanford, The Economist, 2015-04-28 Business failure is not limited to start ups Industry Watch published by BDO Stoy Hayward an accounting firm predicts that 17 043 businesses will fail in the UK in 2006 a further 4 per cent increase from 2005 In America between 1990 and 2000 there were over 6 3 million business start ups and over 5 7 million business shut downs Risk of failure can be greatly reduced through effective organizational design that encourages high performance and adaptability to changing circumstances Organization design is a straightforward business process but curiously managers rarely talk about it and even more rarely take steps to consciously design or redesign their business for success This new Economist guide explores the five principles of effective organization design which are that it must be driven by the business strategy and the operating context not by a new IT system a new leader wanting to make an impact or some other non business reason involve holistic thinking about the organization be for the

Palmes, 2005-06-07 Northern Pipe Products is today experiencing unprecedented efficiencies employee involvement a vibrant and desired training program record output per man hour and lowest overall waste in company history What it did and learned over five years is the story of this book The science of Self Directed Work Teams resides in the realization that chance and stewardship are different sides of the same coin Admitting to the obvious truth of infinite human variation dismantles the notion of truly controlling people If not in their actions surely in their minds and reflected in their attitudes people resent being told what to do They much prefer to be told why something must be done and then allowed to apply their unique talents and strengths to manage the assignment Leaders who understand and therefore respect individual differences use diversity to create value allowing the insights of others to create often superior approaches This story could have taken place in a hospital school supermarket or any other organization that requires people to work together for the greater good Regardless of the setting be it computer service healthcare education manufacturing or child care what follows could just as well be your story Because it s about people and their unlimited potential to achieve extraordinary things the manufacture of pipe is simply a metaphor Any group of people facing another day just like yesterday can choose to follow this path

Civil Services in the EU of 27 Christoph Demmke,Timo Moilanen,2010 This volume compares and analyses the national civil services and the most important reform trends in the 27 Member States of the European Union The authors first examine the reform processes concerning civil servants legal status organisational changes recruitment policies remuneration decentralisation of human resource responsibilities job security and ethics They consider in what ways similarities and differences can be detected amongst the 27 Member States and whether and to what extent the national civil services move away from traditional bureaucratic structures Finally the authors discuss the main outcomes of the reform processes and the future of the classical civil service This publication contrasts with the many popular and speculative statements that too often capture the headlines on the future of the civil service and the different human resource management reforms Instead it is a measured conclusion about emerging trends and developments in this

important policy area The authors argue that the reform of the public sector will not as many have predicted be characterised by clear changes and progress in the area Instead the outcomes of the reform reveal a more complex picture of piecemeal and paradoxical patterns of change
