Ward,2016-09-30 Examines how Aristotle posits political philosophy and the experience of friendship as a means to bind strictly intellectual virtue with morality In this book Ann Ward explores Aristotle's Nicomachean Ethics focusing on the progressive structure of the argument Aristotle begins by giving an account of moral virtue from the perspective of the moral agent only to find that the account itself highlights fundamental tensions within the virtues that push the moral agent into the realm of intellectual virtue However the existence of an intellectual realm separate from the moral realm can lead to lack of self restraint Aristotle Ward argues locates political philosophy and the experience of friendship as possible solutions to the problem of lack of self restraint since political philosophy thinks about the human things in a universal way and friendship grounds the pursuit of the good which is happiness understood as contemplation Ward concludes that Aristotle's philosophy of friendship points to the embodied intellect of timocratic friends and mothers in their activity of mothering as engaging in the highest form of contemplation and thus living the happiest life **Philosophy Goes to the Movies** Christopher

Consciousness, Awareness, and Anesthesia George A.

Mashour, 2010-01-25 Hypnosis amnesia and immobility are three major therapeutic endpoints of general anesthesia In one to two cases out of a thousand hypnosis and amnesia are not achieved often leaving a patient immobile but capable of experiencing and remembering intraoperative events Awareness during general anesthesia is one of the most dreaded complications of surgery and is feared by patients and clinicians alike Despite many advances in the field there are also a number of unresolved questions that persist Some of the difficulties in the detection and prevention of awareness during anesthesia relate to the underlying complexities of the neuroscientific basis of consciousness Consciousness Awareness and Anesthesia is a multidisciplinary approach to both the scientific problem of consciousness and the clinical problem of awareness during general anesthesia An international cadre of authors with expertise in anesthesiology neurobiology and philosophy provides a cutting edge perspective No other book on the subject has drawn from such a breadth of scholarship

Handbook of Ethnography in Healthcare Research Paul Hackett, Christopher Hayre, 2020-12-02 This handbook provides an up to date reference point for ethnography in healthcare research Taking a multi disciplinary approach the chapters offer a holistic view of ethnography within medical contexts This edited volume is organized around major methodological themes such as ethics interviews narrative analysis and mixed methods Through the use of case studies it illustrates how methodological considerations for ethnographic healthcare research are distinct from those in other fields It has detailed content on the methodological facets of undertaking ethnography for prospective researchers to help them to conduct research in both an ethical and safe manner It also highlights important issues such as the role of the researcher as the key research instrument exploring how one s social behaviours enable the researcher to get closer to his her participants and thus uncover original phenomena Furthermore it invites critical discussion of applied methodological strategies within

the global academic community by pushing forward the use of ethnography to enhance the body of knowledge in the field. The book offers an original guide for advanced students, prospective ethnographers, and healthcare professionals aiming to utilize this methodological approach. *A Bibliography of Philosophy* William Swan Sonnenschein, 1897 *A Reader's Guide to Contemporary Literature* William Swan Sonnenschein, 1896 **Peace Education and Religion: Perspectives, Pedagogy, Policies** Marcia Hermansen, Ednan Aslan, Evrim Erşan Akkılıç, 2022-10-02 Whether formally incorporated into curriculum and teacher training or informally integrated in contexts such as state or NGO initiatives dealing with resolving social, ethnic, and religious conflicts, peace education is increasingly recognized as a critical component in addressing violence in contemporary plural societies. Peace education can constructively undertake a reframing of historical narratives while inspiring practical community activities. An important but insufficiently studied and theorized aspect of peace education is the role of religion. The challenge to peace education in today's globalized, diverse, mobile, and religiously pluralistic world is to be able to take both complex global and distinctive local situations into account. The contributions to this integrative collection of essays provide exactly these local and global perspectives on the state of peace education and its relationship to religion across pedagogy and curriculum, state policies, and activism within societies on the front lines of resolving internal conflicts, whether historical or recent, that often reflect aspects of religious identities. **The Publishers' Circular and General Record of British and Foreign Literature**, 1843 *Publishers' circular and booksellers' record*, 1875 **The Spectator**, 1843 A weekly review of politics, literature, theology, and art *The Best Books* William Swan Sonnenschein, 1891
