Navy** Gary D. Joiner,2007-07-26 The Union inland navy that became the Mississippi Squadron is one of the greatest yet least
studied aspects of the Civil War Without it however the war in the West may not have been won and the war in the East
might have lasted much longer and perhaps ended differently The men who formed and commanded this large fighting force
have with few exceptions not been as thoroughly studied as their army counterparts The vessels they created were highly
specialized craft which operated in the narrow confines of the Western rivers in places that could not otherwise receive fire
support Ironclads and gunboats protected army forces and convoyed much needed supplies to far flung Federal forces They
patrolled thousands of miles of rivers and fought battles that were every bit as harrowing as land engagements yet inside
iron monsters that created stifling heat with little ventilation This book is about the intrepid men who fought under these
conditions and the highly improvised boats in which they fought The tactics their commanders developed were the basis for
many later naval operations Of equal importance were lessons learned about what not to do The flag officers and admirals of
the Mississippi Squadron wrote the rules for modern riverine warfare **A Research Guide to Cartographic Resources**
Eva H. Dodsworth,2018-09-22 The interdisciplinary uses of traditional cartographic resources and modern GIS tools allow for
the analysis and discovery of information across a wide spectrum of fields A Research Guide to Cartographic Resources
navigates the numerous American and Canadian cartographic resources available in print and online offering researchers
academics and students with information on how to locate and access the large variety of resources new and old Dozens of
different cartographic materials are highlighted and summarized along with lists of map libraries and geospatial centers and
related professional associations A Research Guide to Cartographic Resources consists of 18 chapters two appendices and a
detailed index that includes place names and libraries structured in a manner consistent with most reference guides
including cartographic categories such as atlases dictionaries gazetteers handbooks maps plans GIS data and other related
material Almost all of the resources listed in this guide are categorized by geography down to the county level making
efficient work of the type of material required to meet the information needs of those interested in researching place specific
cartographic related resources Additionally this guide will help those interested in not only developing a comprehensive
collection in these subject areas but get an understanding of what materials are being collected and housed in specific map
libraries geospatial centers and their related websites Of particular value are the sections that offer directories of

cartographic and GIS libraries as well as comprehensive lists of geospatial datasets down to the county level This volume combines the traditional and historical collections of cartography with the modern applications of GIS based maps and geospatial datasets **Map Link Catalog** ,2008 *Maps and Atlases* Library of Congress.
