Managing Indonesia:

Managing Indonesia's Transformation Ginandjar Kartasasmita, 2013 *Managing Indonesia's Transformation* An Oral History is an account of Ginandjar Kartasasmita's career in the Indonesian government both under President Suharto and in the post Suharto era. Based on all the ministerial positions in which Kartasasmita has served the government, the book provides readers with candid insights into the domestic and international political and economic contexts in which decisions were made and how policies were formulated and implemented in Indonesia. The book contains many hours of interviews in which the author responds as frankly as he can to all sorts of questions from a group of scholars and specialists working on Indonesian politics and political economy with the understanding that the book is for those who want to understand Indonesian politics both past and present.

Indonesian Destinies Theodore Friend, 2009-07-01 How can such a gentle people as we are be so murderous? A prominent Indonesian asks. That question and the mysteries of the archipelago's vast contradictions haunt Theodore Friend's remarkable work, a narrative of Indonesia during the last half century from the postwar revolution against Dutch imperialism to the unrest of today. Part history, part meditation on a place and a past observed firsthand, *Indonesian Destinies* penetrates events that gave birth to the world's fourth largest nation and assesses the continuing dangers that threaten to tear it apart. Friend reveals Sukarno's character through wartime collaboration with Japan and Suharto's through the mass murder of communists that brought him to power for thirty-two years. He guides our understanding of the tolerant forms of Islam prevailing among the largest Muslim population in the world and shows growing tensions generated by international terrorism. Drawing on a deep knowledge of the country's cultures, its leaders and its ordinary people, Friend gives a human face and a sense of immediacy to the self-inflicted failures and immeasurable tragedies that cast a shadow over Indonesia's past and future. A clear and compelling passion shines through this richly illustrated work. Rarely have narrative history and personal historical witness been so seamlessly joined.

The context of natural forest management and FSC certification in Indonesia Claudia Romero, Francis E. Putz, Manuel R. Guariguata, Erin O. Sills, Ahmad Maryudi, Ruslandi, 2015-07-01 Management decisions on appropriate practices and policies regarding tropical forests often need to be made in spite of innumerable uncertainties and complexities. Among the uncertainties are the lack of formalization of lessons learned regarding the impacts of previous programs and projects. Beyond the challenges of generating the proper information on these impacts, there are other difficulties that relate with how to socialize the information and knowledge gained so that change is transformational and enduring. The main complexities lie in understanding the interactions of social ecological systems at different scales and how they varied through time in response to policy and other processes. This volume is part of a broad research effort to develop an independent evaluation of certification impacts with stakeholder input which focuses on FSC certification of natural tropical forests. More specifically, the evaluation program aims at building the evidence base of the empirical biophysical, social, economic and policy effects that FSC certification of natural forest has had.

in Indonesia as well as in other tropical countries The contents of this volume highlight the opportunities and constraints that those responsible for managing natural forests for timber production have experienced in their efforts to improve their practices As such the goal of the studies in this volume is to serve as the foundation to design an impact evaluation framework of the impacts of FSC certification of natural forests in a participatory manner with interested parties from institutions and organizations to communities and individuals

Managing Conflicts in a Globalizing ASEAN Mikio

Oishi,2019-11-11 This book investigates the patterns of conflict management in contemporary Southeast Asia The region has long been characterized by the twin process of state formation and nation building which has been responsible for most of the region's intrastate and interstate conflicts While this process is still ongoing regional conflicts and their management are increasingly affected by globalisation which not only serves as a new source of or exacerbating factor to conflict but also makes new instruments available for conflict management Employing the concepts of incompatibility management and mediation regime the book analyses the management of seven conflicts in the region the Rohingya crisis and the Kachin conflict in Myanmar the Khmer Krom conflict in Vietnam the West Papua conflict in Indonesia the political conflict in Thailand the Mekong River conflicts involving five Southeast Asian countries and China and the transboundary haze problem emanating from Indonesia The efforts to manage each of them are imagined as constituting a mediation regime and its effectiveness is assessed in terms of good governance Among the findings of the book is that the measures of manoeuvring around incompatibilities are employed predominantly in managing regional conflicts In intrastate conflicts which mostly involve ethnic minorities the authorities first aim to eliminate or impose its own position on ethnic parties When this strategy proves unsuccessful they have no choice but manoeuvre around incompatibilities which may eventually open up a space for mutual learning In interstate conflicts the manoeuvring around strategy works in a more straightforward manner contributing to regional stability However the stability is achieved at the cost of local communities and the natural environment which absorb the incompatibilities in conflict

challenges in using and managing natural resources in Indonesia are immense They include ensuring that resource utilisation benefits most Indonesians optimising the rate of exploitation of mineral reserves bearing in mind the interests of future generations and achieving sustainable forest and maritime exploitation Recent rapid political change under reformasi and decentralisation may seem to have provided opportunities for a long term development path that embraces both resource sustainability and equity issues However they have also generated an environment of political uncertainty weak law enforcement increased insecurity of property rights and local conflicts This situation together with the post crisis imperative of restoring socio economic progress has created a pressing need to address the challenges of proper utilisation and management of natural resources This book examines these and related issues from a political socio economic and environmental standpoint 1st Reprint 2006 *Indonesia's Maritime Policy from Independence to 2019* Indra

Alverdian,2024-08-02 Alverdian explores how a distinct national character of maritime governance has influenced the nature of Indonesia s aspiration to go beyond archipelagic towards a maritime nation through focusing on the intersection between the nation s political culture historical changes and geopolitical contexts which gave rise to the primacy of the theme of unity in the nation s discourse The main theme of this research is the three pillar framework of the Tanah Air concept which includes the political culture of persatuan nasional national unity the strategic culture of cakra manggilingan turning of the times from dark to golden periods and the geopolitical context of posisi silang dunia world crossroad position The findings of this publication indicate the dominant influence of Javanese political culture philosophy values and traditions on the distinct character of Indonesia s maritime orientation Specifically Javanese political philosophy and traditions within each pillar of Tanah Air have influenced continuity rather than change in the evolution of Indonesia s maritime policy This book helps readers understand how the defining theme of unity in national political culture has shaped the evolution of Indonesia s maritime policy from 1945 to 2019 It illustrates how the continuous influence of the theme of national unity as devised by the political elites through history has addressed the realities of the archipelago s geography and it is significant from both an academic and practical policy perspective A book designed for academics and the general public interested in gaining greater insight and knowledge on Indonesia s maritime policy and maritime nation aspirations *Communities and Forest*
