

An abstract, monochromatic blue-toned artwork. It features several stylized, overlapping arms and hands reaching across the frame. The hands are positioned at the top right and bottom right, with arms extending towards the left. The background is a deep blue with some darker, almost black, angular shapes that create a sense of depth and movement. The overall composition is minimalist and evocative.

Negotiating Disease Power And Cancer Care 1900 195:

Negotiating Disease Barbara Clow, 2001-09-20 Her detailed analysis of popular beliefs and behaviours reveals the compelling logic of personal decisions about health and healing Experience and expectation not fear and ignorance shaped the health care choices of both cancer sufferers and the healthy public A close examination of three unconventional practitioners in Ontario demonstrates the importance and vitality of alternative medicine By presenting treatment options that were congenial and plausible to cancer sufferers these healers contested the authority of conventional medicine An investigation of government cancer care policy particularly the activities of Ontario's Commission for the Investigation of Cancer Remedies exposes the difficulties of defining legitimate health care and the limits of state support for the medical profession This is ultimately a book about who held power in medical encounters in the past With masterful assurance and a highly readable style Clow portrays the disputes between sufferers and healers practitioners and politicians and legislators and laity that coloured perceptions of medical authority and constrained the power of the profession Locating Health Erika Dyck, Christopher Fletcher, 2015-10-06 The essays in this collection focus on the dynamic relationship between health and place Historical and anthropological perspectives are presented each discipline having a long tradition of engaging with these concepts The resulting dialogue should produce a new layer of methodology enhancing both fields *The British National Bibliography* Arthur James Wells, 2004 Naked Brian Hoffman, 2015-05-01 In 1929 a small group of men and women threw off their clothes and began to exercise in a New York City gymnasium marking the start of the American nudist movement While countless Americans had long enjoyed the pleasures of skinny dipping or nude sunbathing nudists were the first to organize a movement around the idea that exposing the body corrected the ills of modern society and produced profound benefits for the body as well as the mind Despite hostility and skepticism American nudists enlisted the support of health enthusiasts homemakers sex radicals and even ministers and in the process redefined what could be seen experienced and consumed in twentieth century America Naked gives a vibrant detailed account of the American nudist movement and the larger cultural phenomenon of public nudity in the United States Brian S Hoffman reflects on the idea of nakedness itself in the context of a culture that wrestles with an inherent sense of shame and conflicting moral attitudes about the body In exploring the social and legal history of nudism Hoffman reveals how anxieties about gender race sexuality and age inform our conceptions of nakedness The book traces the debates about distinguishing deviant sexualities from morally acceptable display the legal processes that helped bring about the dramatic changes in sexuality in the 1960s and 1970s as well as the explosion in eroticism that has increasingly defined the modern American consumer economy Drawing on a colorful collection of nudist materials films and magazines Naked exposes the social cultural and moral assumptions about nakedness and the body normally hidden from view and behind closed doors **Negotiating Disease** Barbara Natalie Clow, 2001 Criticism of conventional medicine is often regarded as a product of the 1960s Before then scientific medicine enjoyed

uncontestable cultural prestige with kindly but strict doctors wielding unquestioned authority over grateful patients while quacks flogged dubious remedies to the poor and credulous or so go popular perceptions and for the most part received scholarly wisdom But the very nature of cancer mysterious capricious and deadly challenged medical authority in the past as much as it does today and in *Negotiating Disease* Barbara Clow lays to rest old assumptions about the monopoly of health care by doctors in the first half of the twentieth century Her detailed analysis of popular beliefs and behaviours reveals the compelling logic of personal decisions about health and healing Experience and expectation not fear and ignorance shaped the health care choices of both cancer sufferers and the healthy public A close examination of three unconventional practitioners in Ontario demonstrates the importance and vitality of alternative medicine By presenting treatment options that were congenial and plausible to cancer sufferers these healers contested the authority of conventional medicine An investigation of government cancer care policy particularly the activities of Ontario's Commission for the Investigation of Cancer Remedies exposes the difficulties of defining legitimate health care and the limits of state support for the medical profession This is ultimately a book about who held power in medical encounters in the past With masterful assurance and a highly readable style Clow portrays the disputes between sufferers and healers practitioners and politicians and legislators and laity that coloured perceptions of medical authority and constrained the power of the profession

Rosenthal, 2021-10-11 A 2022 Choice Reviews Outstanding Academic Title An important history of the development of cancer centers of excellence and the revolution in cancer treatment In the 1960s a coalition of concerned citizens scientists and politicians joined forces to convince the federal government to focus its efforts on conquering cancer The National Cancer Act of 1971 resulted and was signed into law on December 23 1971 by President Nixon The national War on Cancer was declared with some leaders naively arguing that the disease would be conquered by the nation's bicentennial a mere five years in the future Over the next five decades scientific discoveries demonstrated the great complexity of what had formerly been thought of as a single disease with the advent of the genetic characterization of cancers it is now recognized that there are almost an infinite number of cancers as defined by their many genetic mutations The National Cancer Act established the

infrastructure for the designation of centers by the National Cancer Institute NCI and these centers have evolved into models of multidisciplinary collaborative cancer research treatment and prevention contributing to a reduction in cancer mortality and increase in quality of life and survival that has translated into more than 17 million cancer survivors in the United States in 2021 Centers of the Cancer Universe A Half Century of Progress Against Cancer tells the story of how cancer research was not front and center at most universities and research institutions before the National Cancer Act of 1971 and why many physicians were reluctant even to treat patients with cancer in the early 20th century It follows the behind the scenes lobbying resistance and negotiating that preceded signing the Act into law and how the cancer centers of today came to fruition and shaped how cancer research clinical trials and treatment would be conducted **Delivering Affordable**

Forum, 2013-06-20 Rising health care costs are a central fiscal challenge confronting the United States National spending on health care currently accounts for 18 percent of gross domestic product GDP but is anticipated to increase to 25 percent of GDP by 2037 The Bipartisan Policy Center argues that this rapid growth in health expenditures creates an unsustainable burden on America's economy with far reaching consequences These consequences include crowding out many national priorities including investments in education infrastructure and research stagnation of employee wages and decreased international competitiveness In spite of health care costs that far exceed those of other countries health outcomes in the United States are not considerably better With the goal of ensuring that patients have access to high quality affordable cancer care the Institute of Medicine's IOM's National Cancer Policy Forum convened a public workshop Delivering Affordable Cancer Care in the 21st Century October 8-9 2012 in Washington DC Delivering Affordable Cancer Care in the 21st Century summarizes the workshop **The Cancer Generation: Baby Boomers Facing a Perfect Storm** John

Geyman M D, 2009-07-01 The Cancer Generation is the most honest and thorough accounting of the status of our nation's war on cancer that I have ever read It captures that extraordinarily complex blend of hope and fear disappointment and optimism that characterizes a diagnosis of cancer for individuals and the spectrum of cancer for the country John Geyman's book is easy to read and totally convincing the cancer storm is here and is about to intensify But this thoroughly researched book provides far more than a warning about our rising cancer burden Geyman utilizes his life's experience as a primary care physician and policy expert to identify the decisions and investments that we must make today to navigate our way through the cancer storm to a healthier future Richard Wender M D Professor and Chairman Department Of Family Medicine Thomas Jefferson University Philadelphia PA and past president of the American Cancer Society
