In the 1960s and 1970s Third World governments prescribed and imposed a certain kind of journalism variously called objective journalism or development journalism They understood this as journalism restricted to reporting facts as dished out by their propagandists and did not tolerate the questioning of government policy By development journalism they meant the mere reporting of government efforts to provide services amenities and infrastructures and the singing of praises anytime a bridge was inaugurated irrespective of whether it was well built or whether the contract to build was awarded according to the norms of transparency and probity This one sided journalism was prevalent especially in state owned media and media practitioners in the few private news publications that existed who did not toe the line were subjected to constant harassment and incarceration However with the coming of well trained journalism graduates into the scene in the 1970s and the advent of global liberalization in the late 1980s and 1990s daring journalists like Sam Nuvala Fonkem thought it was time to take the bull by the horn and start taking a more critical look at government pronouncements matching policy statements with real action in the field in short moving from objective journalism to interpretative and investigative journalism This collection of Sam Nuvala Fonkem s writings is a sampling of the fruit of that new spirit to dare where angels hitherto feared to tread to hold public officials to account and to expose the falsehood cached behind the political masquerade of the ruling class

WE HAVE A JOB FOR YOU Just a routine day in lunar orbit That s all Lieutenant Commander Colin MacIntyre USN expected Only a simple training mission to test a new survey instrument intended for the first manned American Russian interstellar flight What he got was just a bit different First there was the fact that Earth didn t actually have a Moon Then there was the three thousand kilometer diameter alien starship pretending it was the Moon And the millennia old cybernetic intelligence that shanghaied him to serve as its crew Colin might have been forgiven for thinking that those were enough surprises for any one man but there were a few other small problems Like the deadly mutiny which had been raging longer than the human race had existed on Earth and still wasn t over Or like the millions of other starships crewed by genocidal aliens dedicated to the extermination of all possible competing life forms which just happened to be headed straight towards Earth Or like the interstellar empire whose aid offered humanity s only hope for survival except for the minor fact that its last emperor and all of his subjects had died forty five thousand years ago Add in the occasional homicidal terrorist religious fanatics convinced that the only good MacIntyre was a dead MacIntyre a bic weapon capable of killing every living thing on any planet a super bomb which could take out whole worlds a starship drive which could destroy complete solar systems and the need to organize the entire planet Earth and all of its warring mutually murderous factions

for a probably hopeless last ditch defense and Colin was convinced that things were just about as bad as they could possibly get Until he found out whose job it had just become to fix all those problems of course At the publisher s request this title is sold without DRM Digital Rights Management *Lung Imaging in Respiratory Failure* Paolo Pelosi,Lorenzo Ball,Patricia R. Rocco,2022-03-25 **Voyage of the Southern Sun** Michael Smith,2017-10-30 The remarkable true story of one man s daring solo flight around the world in a tiny amphibious plane University dropout Michael Smith built a multimillion dollar business fitting out movie theatres around the world before restoring Melbourne s Sun Theatre and becoming one of the country s last independent cinema operators After a business deal went bad and shaken by how close he had come to being wiped out Smith took an even bigger risk to become the first person to fly solo around the world in an amphibious plane retracing the 1938 Qantas Imperial and Pan Am flying boat routes between Sydney Southampton and New York With limited flying experience no support team and only basic instruments in his tiny single engine flying boat the Southern Sun Smith risked his life to make modern aviation history His adventures include an unexpected greeting by Special Branch on his arrival in the UK a near death experience while leaving Greenland and a journey up the Mississippi landing on the river and sleeping on sandbanks at night He made eighty stops on his flight around the globe exploring cities and communities as well as visiting some seventy cinemas All along the way Smith was updating his online journal cheered on by more than 50 000 followers Smith s historic flight lasted seven months and took him from Australia to East Timor Indonesia Singapore Malaysia Thailand Bangladesh India Pakistan Dubai Abu Dhabi Saudi Arabia Israel Crete Croatia Italy France England Ireland Scotland Iceland Greenland Canada the United States Japan and the Philippines before finally returning to Australia This is the incredible story of his journey The blue sky dreaming of Walter Mitty the resourcefulness of Phileas Fogg and dare I say it the over confidence and geniality of Mr Toad in a flying machine Surely these literary figures were the inspiration for such an adventure A marvellous exploit and wonderfully told A J Mackinnon author *The Unlikely Voyage of Jack de Crow* Great Aussie spirit in a good old fashioned seat of the pants adventure a remarkable journey retracing the golden era of aviation for both the Southern Sun and Michael Smith who is very lucky to be alive Dick Smith **From Anesthesia to X-Rays** Christiane Nockels Fabbri,2016-11-28 Easy to read and to use this A to Z mini encyclopedia covers the most important medical innovations of the last 200 years Medical innovation is an extremely important topic and one to which relatively little study has been devoted This volume is designed to introduce readers to the history and development of key advances in the science and practice of medicine It explores issues in medical history and provides perspective on contemporary scientific research and innovation It also provides a backdrop against which to evaluate current headlines such as the discoveries of live samples of smallpox virus in an unused storage room at the National Institutes of Health NIH and incidents of bubonic plague in China and Colorado Although the entries in this single volume resource describe how each innovation works this is not intended as a technical text Instead the focus is on the context in which each innovation was developed and on its lasting

importance in the field of medicine Through these fascinating accounts readers will be able to trace the evolution and legacy of key innovations and to see how other sectors of society such as industry and the military have affected and been affected by advances in the field of medicine The Female Pelvic Floor Peter E. Papa Petros,2013-04-18 The initial objective of this work was to reduce stress incontinence surgery from a major surgical procedure requiring up to ten days in hospital to a minor day care operation From the beginning it was clear that the two major impediments to achieving this goal were post operative pain and urinary retention Addressing these problems became a long and winding road and culminated in the Integral Theory The IVS tension free tape operation was inspired by Dr Robert Zacharin s anatomical studies Though Zacharin suggested that the ligaments and muscles around the urethra were important for urinary continence control he did not say how The observation that implanted foreign materials created scar tissue led to the hypothesis that a plastic tape inserted in the position of the pubourethral ligament would leave behind sufficient scar tissue to reinforce that ligament which would then anchor the muscles for urethral closure In September 1986 two prototype Intravaginal Sling operations were performed A Mersilene tape was inserted with neither tension nor elevation in the position of the pubourethral ligament Restoration of continence was immediate and both patients were discharged on the day following surgery without requirement for catheterization There was minimal pain and immediate restoration of continence After six weeks the tapes were removed Both patients were still continent at last review 10 years later The results appeared to confirm the importance of a midurethral anchoring point Wild Life Jackson Whitman,2021-08-09 This book is a compendium of short stories and excerpts of personal journal entries from the life of Jack Whitman a wildlife biologist who spent fifty years in some of the wildest places that remain on this earth It is about his love of those places and the wild inhabitants with which he shared those lands It is about a deep devotion towards understanding the ecology of predators and their prey and with that knowledge greater respect and better management of those natural resources It is about his gratitude for living modestly and pushing life to the limits It will make you laugh It will make you cry *Computed Tomographic Scanning of the Brain* Charlotte Kenton,1981 **Mutineer's Moon** David Weber,1994-10-01 MUTINY For Lt Commander Colin MacIntyre it began as a routine training flight over the Moon For Dahak a self aware Imperial battleship it began millennia ago when that powerful artificial intelligence underwent a mutiny in the face of the enemy The mutiny was never resolved Dahak was forced to maroon not just the mutineers but the entire crew on prehistoric Earth Dahak has been helplessly waiting as the descendants of the loyal crew regressed while the mutineers maintained control of technology that kept them alive as the millennia passed But now Dahak s sensors indicate that the enemy that devastated the Imperium so long ago has returned and Earth is in their path For the sake of the planet Dahak must mobilize its defenses And that it cannot do until the mutineers are put down So Dahak has picked Colin MacIntyre to be its new captain Now MacIntyre must mobilize humanity to destroy the mutineers once and for all or Earth will become a cinder in the path of galactic conquest At the publisher s

aircraft's speed can upturn our sense of space distance and lifestyles. It can be like a magic carpet ride but there are dangers with little room for error. Becoming a good pilot requires knowledge and teaching which are adequate when things go according to plan. But when an unexpected and disastrous event occurs we learn that survival requires more than piloting skills alone. We discover the value of courage and determination. **First Officer** is an Australian story based at Tyabb on Melbourne's beautiful Mornington Peninsula. **Me, an Old Pilot, and a Three-Legged Dog** Rocky Morrisette, 2013-04-09 Summer Rose Watson is a fifteen year old army brat whose father is on his third deployment to Afghanistan. Once a straight A student and youth leader in her church Summer Rose's grades begin to slip as she sinks into a depression. She stops attending church and is even caught sneaking out of the house. The only thing that keeps Summer Rose's rebellion in check is her flying lessons. But even that is taken away when her plane crashes. In desperation her mother sends Summer Rose to Palmer, Alaska to stay with her grandfather. She worries she'll be stuck out in the wilderness, banished from malls, movies, MTV, and even cell phone service. But once there she finds things aren't as bad as she feared. Grandpa Gus restarts her flying lessons and she gets her driver's license on her sixteenth birthday. She makes a new friend, Esperanza, and she falls for the captain of the JV football team at Colony High. But the Greatland can be a brutal place. Summer Rose is forced to handle some very difficult and dangerous adult situations. She witnesses death for the first time and has her own close encounter. What's more she suspects something is wrong with Grandpa Gus. Whether you are a young woman or man and ever wanted to fly, ever wanted to experience Alaska, ever thought the world wasn't fair, you'll like this book. It has everything from first kisses to volcanic eruptions. And be careful, you just might learn something. **The 1931 International Code of Signals** United States. Where do writers learn their best moves? They use a technique that Roy Peter Clark calls X-ray reading, a form of reading that lets you penetrate beyond the surface of a text to see how meaning is actually being made. In *The Art of X-Ray Reading* Clark invites you to don your X-ray reading glasses and join him on a guided tour through some of the most exquisite and masterful literary works of all time, from *The Great Gatsby* to *Lolita* to *The Bluest Eye* and many more. Along the way he shows you how to mine these masterpieces for invaluable writing strategies that you can add to your arsenal and apply in your own writing. Once you've experienced X-ray reading, your writing will never be the same again.
