Shahzavar Karimzadi, 2013 The concept of the origin of money has been a topic of interest and discussion to almost all schools of economic thought However in spite of minor differences of interpretation most views share an underlying core principal about the rise and origin of money implicit in which is the central belief that barter exchange preceded the money economy This new book offers a challenge to this belief and argues that it is only by making this challenge that we will be in the position to accurately trace the roots of money In an ambitious undertaking the book has gathered and classified the major theories of the origin of money and assessed each at length before presenting an innovative alternative theoretical framework for the formation and the rise of money It blends the objections made against the principal explanations of the origins of money and presents a terminological clarification between what can or cannot be classified as money This study has wide ranging implications in terms of both the operation of the economy and the implementation of monetary policy and will be of interest to all those working in the areas of finance monetary economics economic theory and the history of economic thought **Research Handbook on the History of Trademark Law** Lionel Bently, Robert G. Structure and Change in Indian Society Milton B. Singer, Bernard S. Cohn, Recent theoretical and methodological innovations in the anthropological analysis of South Asian societies have introduced distinctive modifications in the study of Indian social structure and social change This book reporting on twenty empirical studies of Indian society conducted by outstanding scholars reflects these trends not only with reference to Indian society itself but also in terms of the relevance of such trends to an understanding of social change more generally The contributors demonstrate the adaptive changes experienced by the studied groups in particular villages towns cities and regions The authors view the basic social units of joint family caste and village not as structural isolates but as intimately connected with one another and with other social units through social and cultural networks of various kinds that incorporate the social units

into the complex structure of Indian civilization Within this broadened conception of social structure these studies trace the changing relations of politics economics law and language to the caste system Showing that the caste system is dynamic with upward and downward mobility characterizing it from pre British times to the present the studies suggest that the modernizing forces which entered the system since independence parliamentary democracy universal suffrage land reforms modern education urbanization and industrial technology provided new opportunities and paths to upward mobility but did not radically alter the system The chapters in this book show that the study of Indian society reveals novel forms of social structure change They introduce methods and theories that may well encourage social scientists to extend the study of change in Indian society to the study of change in other areas Milton Singer 1912 1994 was Paul Klapper Professor of Social Sciences and professor of anthropology at the University of Chicago He was a fellow of the Academy of Arts and Sciences He was also chosen as a distinguished lecturer by the American Anthropological Association and was the recipient of the Distinguished Scholar Award of the Association for Asian Studies Bernard S Cohn 1918 2003 was Professor Emeritus of Anthropology at the University of Chicago He was widely known for his work on India during the British colonial period and wrote many books on the subject of India including India The Social Anthropology of a Civilization 1971 An Anthropologist among the Historians and Other Essays 1987 and Colonialism and its Forms of Knowledge 1996
