**Building Bridges** Douglas Bristol,2025-06-24 More than 80 percent of Black GIs in World War II served behind the front lines At the beginning of the war segregation policies maintained physical separation of Black and White GIs and only allowed Black soldiers to do simple menial work maintaining a false sense of racial inferiority But the mechanization of armed forces during World War II demanded more skilled laborers behind the front lines The Army Service Forces created in March 1942 turned to Black GIs to solve the serious manpower shortage and trained them for jobs previously done only by White GIs In Building Bridges author Douglas Bristol tells the story of how military necessity led to unprecedented changes in the employment of Black troops These changes had unanticipated consequences American military leaders adopted a new racial discourse that emphasized the rights and potential of Black GIs The new opportunities also exposed racial discrimination giving Black GIs and their allies more leverage to demand better treatment Black GIs built bridges roads and runways They repaired engines and radios They transported bombs bullets food gasoline and water to hard pressed soldiers on the front lines Their numbers skills and necessity only grew as the war continued By the end of the World War II Black GIs had cracked the glass ceiling in the racialized military hierarchy behind the front lines and became indispensable to keeping the American war machine running around the globe

Department of the Army,2001-06 The Writing of American Military History A Guide should stimulate intelligent probing into the past with an eye to the future This in turn should lead to increased wisdom and therefore to wiser decisions and better execution throughout the Army in peace and war The primary purpose of this text is to bring order out of chaos in the fields of historical study and research in the United States Army In line with the views of Clausewitz the principal object of the text is to stimulate a progressive and scientific study of United States military history and leadership with the hope that it will produce searching rather than inventive minds and cool rather than hot heads to which the safety of our country can be most advantageously entrusted in time of emergency or war All officers of the United States Army but particularly those having historical assignments and undergoing instruction at the service schools and colleges or civilian educational institutions will find the text helpful Scholars and others interested in American military affairs may also find it very useful The Writing of American Military History A Guide was originally published by the Department of the Army in June 1956

**United States Army in World War II.** United States. Dept. of the Army. Office of Military History,1947 The Logistics of the 101st Airborne Division in the First Gulf War David M. Ogan,2009-12-15 The historiography of the First Gulf War does not examine logistics at the divisional level rather only high echelon logistics those at the Corps and Theater level are covered This leaves a significant gap in how the upper echelon logistics affected the combat units of the coalition This case study seeks to rectify this gap by examining historical logistics from World War II to the Gulf War and the logistics of the First Gulf War as a whole and subsequently placing the specific logistics of the 101st in the correct context **Shopping All the Way to the Woods** Rachel S. Gross,2024-03-26 A fascinating history of the profitable paradox of the American outdoor experience visiting nature first requires shopping No escape to nature is complete without a trip to an outdoor recreational store or a browse through online offerings This is the irony of the American outdoor experience visiting wild spaces supposedly untouched by capitalism first requires shopping With consumers spending billions of dollars on clothing and equipment each year as they seek out nature the American outdoor sector grew over the past 150 years from a small collection of outfitters to an industry contributing more than 2 percent of the nation s economic output Rachel S Gross argues that this success was predicated not just on creating functional equipment but also on selling an authentic anticommercial outdoor identity In other words shopping for the woods was also about being or becoming the right kind of person Demonstrating that outdoor culture is commercial culture Gross examines Americans journey toward outdoor expertise by tracing the development of the nascent outdoor goods industry the influence of World War II on its growth and the boom years of outdoor businesses
