**Food on Foot** Demet Güzey,2017-04-01 What did great adventurers eat during their expeditions to the far corners of the world How did they view the role of food in their survival and wellbeing What about hikers and backpackers today who set out to enjoy nature pushing their own boundaries of comfort for adventure How does food impact their experience And what do they have in common with pilgrims and soldiers Food is a significant element of our relationship with nature Whether a historical expedition or a weekend camping trip a journey made on foot requires sustenance Without mastering our relationship with food we would have not been to the South Pole or summited Mt Everest or expanded to the west of America However in the reporting of these expeditions so far food has rarely taken a central role It is possible to take a different stance and look at our time on trails with food as the leading character Here Demet G zey offers a fun and interesting read on the social and cultural history developments and challenges in food on trails and in the wild She explores personal accounts news articles and anecdotes to highlight how food has accompanied us in mountaineering desert travel and pilgrimage in the army or on the street From tinned foods to foraging in the wild worm infested hardtack to palate dulling army rations loss of appetite in high altitude to starvation at the trenches no stone is left unturned in this tour of how we manage food on foot and how disasters happen when we do not manage it so well Readers will delight in both the stories of many of the famous explorations and the more current journeys

**Shopping All the Way to the Woods** Rachel S. Gross,2024-03-26 A fascinating history of the profitable paradox of the American outdoor experience visiting nature first requires shopping No escape to nature is complete without a trip to an outdoor recreational store or a browse through online offerings This is the irony of the American outdoor experience visiting wild spaces supposedly untouched by capitalism first requires shopping With consumers spending billions of dollars on clothing and equipment each year as they seek out nature the American outdoor sector grew over the past 150 years from a small collection of outfitters to an industry contributing more than 2 percent of the nation s economic output Rachel S Gross argues that this success was predicated not just on creating functional equipment but also on selling an authentic anticommercial outdoor identity In other words shopping for the woods was also about being or becoming the right kind of person Demonstrating that outdoor

culture is commercial culture Gross examines Americans journey toward outdoor expertise by tracing the development of the nascent outdoor goods industry the influence of World War II on its growth and the boom years of outdoor businesses
