Quaternary History Of The Irish Sea:

The Quaternary History of the Irish Sea C. Kidson, Michael John Tooley, 1977 *The Quaternary History of the Irish Sea* Kidson, 1980-01-01 A New History of the Isle of Man: Evolution of the natural landscape Richard Chiverrell, Dr. Geoff Thomas, John Belchem, Seán Duffy, Harold Mytum, 2000-01-01 This volume provides a fascinating account of the natural forces which shaped the Island's landscape from its formation some 500 million years ago to the present nature of the Manx environment and landscape The story of the island's colonisation by plants and animals sets the scene for the later volumes which deal with the impact of man's arrival A key element of the volume is an in depth examination of the contemporary landscape with an appraisal of how the environment has affected man and how man has affected the environment *The Irish Sea* John C. Sweeney, 1989 **British and Irish Archaeology**, 1994 **Geological History of Britain and Ireland** Nigel H. Woodcock, R. A. Strachan, 2009-04-01 Britain Ireland and their surrounding areas have a remarkably varied geology for so small a fragment of continental crust This region contains a fine rock record from all the geological periods from Quaternary back to Cambrian and a less continuous but still impressive catalogue of events back through nearly 2500 million years of Precambrian time This protracted geological history would have been interesting enough to reconstruct if it had been played out on relatively stable continental crust However Britain and Ireland have developed instead at a tectonic crossroads on crust traversed intermittently by subduction zones and volcanic arcs continental rifts and mountain belts The resulting complexity makes the geological history of this region at once fascinating and perplexing Geological History of Britain and Ireland tells the geological story of the region at a level accessible to undergraduate geologists as well as to postgraduates professionals or informed amateurs The book takes a multi disciplinary rather than a purely stratigraphical approach and aims to bring to life the processes behind the catalogue of historical events Full coverage is given to the rich Precambrian and Early Palaeozoic history as well as to later events more relevant to hydrocarbon exploration The book is profusely illustrated and contains guides to further reading and full references to data sources making it an essential starting point for more detailed studies of the regional geology All British Earth science undergraduates will be required to spend some time studying British Geological History and this book will be the only one available to British undergraduates The book takes a process based approach rather than simply describing the regional stratigraphy Lavishly illustrated with high quality diagrams Pleistocene Environments in the British Isles R.L. Jones, D.H. Keen, 2012-12-06 Recent developments in Pleistocene research have prompted the authors to produce this up to date concise account of environmental changes during the past two million years Well illustrated and referenced it possesses a unique position in the literature on Pleistocene events in the British Isles Studies in the Vegetational History of the British Isles, *The Quaternary History of Ireland* Kevin J. Edwards, William P. Warren, 1985 **Saltmarshes** J. R. L. Allen, K. Pye, 1992-04-09 Seven scientists present an overview of the effects on saltmarshes that are threatened by natural and human events **Bibliography of the**

Quaternary History of Irish Sea Coasts International Union for Quaternary Research. Subcommission on Shorelines of Northwestern Europe, 1977 *The Geology of Ireland* Charles Hepworth Holland, Ian Sanders, 2022-07-18 The Geology of Ireland is about the island of Ireland as a physical whole and includes chapters on marine geology and the history of geology in Ireland The text is intended for professional geologists and students of geology **The Isle of Man** Vaughan Robinson, Danny McCarroll, 1990-01-01 This book drawing on wide experience of the Isle of Man describes interprets and explains the features that make the Island's physical and human landscapes so distinctive and give it a unique sense of place Although the editors have taken a strongly geographical approach to their theme the book is unparalleled in writings on the Isle of Man in the broad range of contributions it has assembled geology quaternary science geomorphology archaeology history natural history political science demography social policy and economics The book definitively reviews current geographical knowledge relating to the Isle of Man bringing together hitherto fragmented scattered and inaccessible work Particular emphasis is placed upon the way in which geographers are returning to their intellectual roots with a renewed focus on both the distinctiveness and sense of place By helping readers to understand the processes that formed and continue to change the Isle of Man's unique physical and human landscapes this book aims both to inform and to enhance enjoyment of the Island **Glacial Marine Sedimentation** John B. Anderson, Gail Mowry Ashley, 1991-01-01 The papers in this collection are based on a symposium held at the 1988 annual meeting of the Geological Society of America with the objective of identifying sedimentary criteria and facies models that can be used to characterize the glacial climate setting of ancient sedimentary sequences Includes papers on Antarctica Alaska and Ellesmere Island and a brief literature review The Geomorphology of North-west England Richard Hugh Johnson, 1985 *Fluvial Geomorphology of Great Britain* K.J. Gregory, 2012-12-06 Fluvial Geomorphology of Great Britain studies the development of river made land forms together with the associated fluvial processes There are many sites of scientific interest and value throughout the UK The GCR sites described in this volume represent the wide range of fluvial land forms in the UK and the accounts provide scientific descriptions of all the fluvial geomorphology sites in Britain selected for statutory nature conservation as SSSIs **The Climatic Scene** Michael J. Tooley, Gillian M. Sheail, 2019-10-30 Originally published in 1985 this volume of essays was compiled in honour of Gordon Manley a major and distinctive twentieth century figure in climatology The range and scope of the topics covered reflect the eclectic interests of Manley whose orientation was always towards the importance of climate and its impact on mankind The state of the art of climatic change is considered at different scales by the contributors from instrumental records on a local scale from Durham and Manchester to discussions on the regional and continental scale Methodological problems relating to climatic change are treated The effects of climate and climatic change on plant distribution disease vectors and agricultural pests are also considered **A Guide to Information Sources in the Geographical Sciences** Stephen Goddard, 1983-01-01 Geography is a wide ranging discipline and the number of information

sources available is truly enormous These include printed books and journal articles maps satellite photographs archives statistical information and much else One particular problem facing geographers is that when one studies a foreign country information may be available only in the foreign country and difficult to obtain This book discusses the information sources available to geographers

European Glacial Landscapes David Palacios, Philip D. Hughes, Jose M. Garcia-Ruiz, Nuria de Andrés, 2022-09-16 European Glacial Landscapes Last Deglaciation brings together relevant experts on the history of glaciers and their impact on the landscape of the main European regions Soon after the Last Glacial Maximum a rapid process of the glacial retreat began throughout Europe This was interrupted several times by abrupt climate cooling which caused rapid although moderate re advance of the glaciers until the beginning of the Holocene when the climate became relatively stable and warm These successive glacial advances and retreats during the Last Deglaciation have shaped much of the European landscape reflecting abrupt climatic fluctuations As our knowledge of abrupt climate changes since the Last Glacial Maximum progresses new uncertainties arise These are critical for understanding how climate changes disseminate through Europe such as the lag between climate changes and the expansion or contraction of glaciers as well as the role of the large continental ice sheets on the European climate All these contributions are included in the book which is an invaluable resource for geographers geologists environmental scientists paleoclimatologists as well as researchers in physics and earth sciences Provides a synthesis that highlights the main similarities or differences through both space and time during the Last Deglaciation of Europe Features research from experts in quaternary geomorphology palaeoclimatology palaeoceanography and palaeoglaciology on the Last Deglaciation in Europe during Termination 1 and the important Late Pleistocene Holocene transition Includes detailed colour figures and maps providing a comprehensive overview of the glacial landscapes of Europe during the last deglaciation

Geology's Significant Sites and their Contributions to Geoheritage R. M. Clary, E.J. Pyle, W.M. Andrews, 2024-07-23 The contributions in this book explore several geologically significant sites and in doing so acknowledge and explore not just the geological exposures themselves but also the people and issues that are fundamentally intertwined with the history of our science and its impact on our society Through selective examples of outcrops and locales integral to the history of geology we explore the evolution of modern geology as well as the geodiversity and geoheritage of our planet While the volume is far from comprehensive the chapters contained herein detail a range for geoheritage value scale of geoheritage sites and potential for geoheritage opportunities that will promote a broader richer understanding of the complexity of the geoheritage of Earth Importantly many chapters offer a cautionary tale of sites almost lost to posterity and submit their take away lessons for community mobilization towards geoheritage site protection
