

¿QUÉ ES LA CIENCIA?

La **ciencia** es un disciplina que se encarga de estudiar e investigar de manera rigurosa, los fenómenos sociales, naturales y artificiales a través de la **observación, experimentación y medición** para dar respuesta a lo desconocido.

La ciencia es un proceso de análisis. Existe una cuestión por resolver, y una **hipótesis** sobre ello que hay que verificar.

Para ello, la ciencia utiliza el **método científico**, que se basa en lo empírico y en la medición, y está sujeto a los principios específicos de las pruebas de razonamiento.

Que Es La Ciencia:

¿Qué es la ciencia? John Ziman,2003-02-05 Muy distinto a otros libros de carácter similar cuidadosamente razonado pero sin realizar un análisis técnico de la naturaleza y significado del conocimiento científico Que es la ciencia abre el camino a la reconciliación en la llamada guerra de las ciencias A través de la descripción de cómo los científicos abordan realmente la investigación y transmiten sus resultados muestra que la filosofía, la psicología y la sociología de la ciencia están inextricablemente relacionadas y que el realismo y el relativismo son solo dos caras de la misma moneda Estudia además cómo para bien y para mal la nueva cultura de la investigación postacadémica basada en el trabajo en equipo y la responsabilidad está cambiando las características filosóficas supuestamente eternas de la ciencia Que es la ciencia? Margarita Michelini,2022-09-12 Las oncecientas uruguayas retratadas en este libro cuentan sus sueños y logros y sus peajes. No es casualidad que en el nivel más alto del Sistema Nacional de Investigadores haya una mujer por cada 34 varones. Tampoco que en los grados iniciales la participación femenina se equipare a la de ellos. Habla de una lucha de obstáculos y prejuicios más o menos conscientes y vastamente estudiados que lentamente va cambiando. Las oncecientas uruguayas retratadas en este libro cuentan sus sueños y logros y sus peajes. Estas personas guardan la esperanza de contagiar a quienes se plantean seguir sus pasos y a los lectores todos para que puedan darle a su labor el lugar que merece. Sin ellas la ciencia tendrá otro tinte. Trabajan con pasión en silencio en temas que parecen lejanos y sin embargo repercuten en la vida de todos. Productos naturales que contrarrestan el uso de plaguicidas, sistemas de información para cuidar el ambiente, el amor por parte de personas tan imperceptibles como poderosas. El testimonio de una loca idea, la estadística aplicada para modelar el comportamiento del SARS-CoV-2 y la carrera para fabricar en Uruguay un kit para detectarlo se cruzan con una científica emprendedora, una doctora del clima, especialista en enfrentar temporales; una experta en mecatrónica que hace hablar a las matemáticas. Cuando la creatividad y las neuronas se conjugan con entrega el resultado no tiene límites.

Social Science Elgin F. Hunt, David C. Colander, 2005. This classic text provides a revised and updated survey of the social sciences written in an unbiased manner with a multidisciplinary common sense approach. Comprehensive coverage incorporates elements of anthropology, economics, political science, sociology, history, and geography. The twelfth edition highlights the dramatic political and economic changes that have swept the world in recent years, including extensive examinations of the impact of the 9/11 terrorist attacks in the Political Science and Economics chapters.

La unidad, alma de la ciencia, es el pío de toda criatura, lo que la asemeja a Dios, y lo que encuentra el espíritu en sí, en la naturaleza y en la humanidad, la filosofía va asentándola en todas las ciencias e instituciones sociales Isaac Núñez de Arenas, 1862
