Que Son Los Alimentos Transgenicos:

Alimentos transgenicos / Transgenic Food Julio Muñoz Rubio, 2004-10-30 Uno de los temas más polémicos derivados de las investigaciones en biotecnología es el de los llamados alimentos transgénicos. Las grandes posibilidades que se encuentran en la fabricación de nuevas variedades de alimentos a partir de la manipulación genética de los organismos han sido ensalzadas por los impulsores de tales tecnologías quienes defienden su punto de vista planteando que en el futuro inmediato estos organismos pueden ser una herramienta poderosa que ayude a reducir el hambre en el mundo sin embargo frente a estos puntos de vista fuertes oposiciones se han levantado en amplias regiones del mundo por parte de ecologistas campesinos y el movimiento contra la globalización todos han denunciado los peligros a la salud y al ambiente que dichos alimentos conllevan y han denunciado el papel que las grandes compañías transnacionales están jugando al buscar imponer sus intereses económicos en todo el mundo y destruir las formas autóctonas de cultivo y aprovechamiento de los alimentos. Es prácticamente la primera vez que se logra reunir en un solo libro las contribuciones de la mayoría de los principales estudiosos del problema de los alimentos transgénicos en México desde académicos hasta miembros de organizaciones no gubernamentales. En él están representadas las diversas posiciones que al respecto se están manifestando en nuestro país. Su lectura resultará estimulante para todo aquel interesado en esta problemática sea un especialista o no. La intención al editarlo es hacer comprensible para una amplia gama de sectores sociales esta interesante polémica. Este libro tiene como antecedente el ciclo de mesas redondas Alimentos transgénicos Un problema y una solución desde la interdisciplina organizado por el Centro de Investigaciones Interdisciplinarias en Ciencias y Humanidades de la UNAM en noviembre de 2002. **Aspectos científicos, jurídicos y**

éticos de los transgénicos Juan Ramón Lacadena, 2001 La utilización de plantas y alimentos transgénicos ha suscitado recelo y temor en la sociedad por sus posibles peligros ecológicos y bio sanitarios. Por otro lado la utilización de animales transgénicos en experimentación también puede plantear problemas importantes. Dada la preocupación de Javier Gafo por los temas biotecnológicos no es de extrañar que eligiera este tema para el debate anual de la Cátedra de Biotecnología. in order to explain their paths differences ruptures and changes the author reveals that the emergence of the two nations as leading producers of GM crops cannot be explained by technological superiority of biotechnology rather their trajectories are the results of political struggles surrounding agrarian development in which social movements and the rural poor contested the advancement of biotechnologically based agrarian models but have been silenced ignored or demobilized by a network of actors in favour of GM crops Based on rich interview and media material collected amongst activists the author highlights the importance of political struggles over GM crops not only to debates on agrarian futures and food security but also as illustrations of the challenges faced by contemporary democracies An international comparative study this book raises the question of how social mobilization and rights claims can counter the systemic imperatives of global capitalism and political interests at a time when regional governments are reliant on commodity booms whilst globally governments are obliged to introduce programmes of austerity As such it will appeal to scholars of sociology political science and geography with interests in social movements development globalization inequality and political economy
