Changing Schools Lynda Measor, Peter Woods, 2019-12-09 Changing schools at 11 or 12 is a critical often traumatic event in a pupil s career Earlier studies had looked at this transitional stage from the schools point of view in the light of institutional aims and objectives Originally published in 1984 this richly detailed and readable study looks at it from the pupils point of view it illustrates their perceptions of the transfer their anxieties and their experiences The book is the result of a research project in which children transferring from a typical middle school to a typical comprehensive in a Midlands town were observed over a period of eighteen months The authors reveal various ways in which children adjust to a large more complex school organisation to new forms of discipline and authority and new demands in school work They emphasise

the significance of teenage culture during this period and identify an important area of interplay between school culture and sub culture They pay special attention to gender identities and the ways in which these affect pupils responses to different subjects in the curriculum Finally they consider the theoretical and policy implications of their survey and make positive recommendations for improving school and classroom practice at both primary and secondary level **Harper's Bazaar**
