Gender, and Ideology Shigeko Okamoto, Janet S. Shibamoto Smith, 2004-10-28 Japanese Language Gender and Ideology is a collection of previously unpublished articles by established as well as promising young scholars in Japanese language and gender studies. The contributors to this edited volume argue that traditional views of language in Japan are cultural constructs created by policy makers and linguists and that Japanese society in general and language use in particular are much more diverse and heterogeneous than previously understood. This volume brings together studies that substantially advance our understanding of the relationship between Japanese language and gender with particular focus on examining local linguistic practices in relation to dominant ideologies. Topics studies include gender and politeness, the history of language policy, language and Japanese romance novels and fashion magazines, bare talk, dictionary definitions and the use of first person pronouns. The volume will substantially advance the agenda of this field and will be of interest to sociolinguists, anthropologists, sociologists and scholars of Japan and Japanese.

Talking Gender and Sexuality Paul McIlvenny, 2002 This edited volume brings together scholars from psychology, linguistics, sociology and communication science to investigate how performative notions of gender and sexuality can be fruitfully explored with the rich set of tools that have been developed by conversation analysis and discursive psychology for analyzing everyday practical language use, agency and identity in talk. Contributors re-examine the foundations of earlier research on gender in spoken interaction, critically appraise this research to see if and how it translates successfully into the study of sexuality in talk and promote innovative alternatives that integrate the insights of recent feminist and queer theory with qualitative studies of talk and conversation. Detailed empirical analyses of naturally occurring talk are used to uncover how gender and sexual identities, agencies and desires are contingently accomplished in conversational practices. Collectively they pose the important question of what a critical theory of talk, gender and sexuality ought to look like if it is to be sensitive to a politics of conversation analysis.

Pronoun Envy Anna Livia, 2001 Controversy over gendered pronouns for example using the generic he has been a staple of feminist arguments about patriarchal language over the last 30 years and is certainly the most contested political issue in Western feminist linguistics Most accounts do not extend beyond policy issues like the official institution of non sexist language In this volume Anna Livia reveals continuities both before and after the sexist language reform movement and shows how the creative practices of pronoun use on the part of feminist writers had both aesthetic and political ends Livia uses the term pronoun envy ironically to show that rather being a case of misguided envy battles over gendered language are central to feminist concerns Livia examines a broad corpus of written texts in English and French concentrating on those texts which problematize the traditional functioning of the linguistic gender system They range from novels and prose poems to film scripts and personal testimonies and in time from the 19th century to the present Some withhold any indication of gender others have non gendered characters Livia's goal is two fold to help bridge the divide between linguistic and literary analysis and to show how careful study of the manipulation of linguistic gender in these texts informs larger concerns This fresh and highly interdisciplinary work lies at the intersection of several vital areas including language and gender sociolinguistics and feminist literary analysis
