España no es país para ríos Ramón J. Soria Breña, 2023-02-23 España no es país para ríos analiza la situación de cuarenta ríos de entre los cerca de treinta mil que recorren las tierras de nuestro país Son los representan a todos porque los problemas que sufren nuestros ríos son comunes a todos ellos los embalses que impiden la circulación y renovación de las aguas la introducción destructiva de especies exóticas la contaminación de la industria y del modelo agropecuario su uso indiscriminado para generar energía y regar huertas inmensas todos estos factores están acabando con la vida de nuestros ríos Pese a las consecuencias del cambio climático que ya casi nadie se atreve a negar con libertad que combina la escasez de agua con periodos puntuales de lluvias torrenciales las soluciones propuestas en la actualidad siguen siendo las mismas que las puestas en práctica hace un siglo embalsar los ríos y exprimir todavía más sus aguas En la actualidad si explicas que las viejas soluciones ya no sirven muchos expertos entendidos planificadores políticos y ciudadanos se encogen de hombros o no se lo creen o confían en que la tecnología superar este puntual problema como antes solucionaron otros más graves como el desastre del Prestige Pero no hay soluciones mágicas Sin ríos limpios corrientes y libres gran parte de España se convertirá en un triste desierto Ya no quedan mejillones perloferos en casi ningún río de España porque sus aguas no están limpias ni corren libres los salmones no remontan los cauces y las truchas desaparecen Pero el problema más grave que padecen nuestros ríos es el olvido la

ignorancia de todos nosotros la escasa atención que les prestamos aunque demos mucha importancia a su agua como recurso para regar beber producir energía desaguar nuestros deshechos o adornar algún paisaje Porque un río es algo más que un canal para regar o el final de una cloaca urbana Junto a un río comienza la humanidad a hacer ciudades y a soñar un futuro
