Nobel Lectures in Peace Frederick W. Haberman, 1999 <http://www.worldscientific.com/worldscibooks/10.1142/3741>

Hammarskjöld Roger Lipsey, 2013-03-18 Drawing from little explored archives and personal correspondence chronicles the life of the second secretary general of the United Nations who was killed in 1961 while en route to ceasefire negotiations in the Congo **A UN 'Legion'**, **The Quest for Peace** Johnson Foundation Inc, 1965 **From Manager to Visionary** K. Kille, 2006-12-11 This study examines how the UN Secretary General's leadership qualities affect how they address threats to peace and security The personal traits of all seven Secretaries General are measured and categorized into one of three leadership styles managerial strategic and visionary The United Nations and Human Rights Frédéric Mégret, Philip Alston, 2020-04-02 The very concept of human rights implies governmental accountability To ensure that governments are indeed held accountable for their treatment of citizens and others the United Nations has established a wide range of mechanisms to monitor compliance and to seek to prevent as well as respond to violations The panoply of implementation measures that the UN has taken since 1945 has resulted in a diverse and complex set of institutional arrangements the effectiveness of which varies widely Indeed there is much doubt as to the effectiveness of much of the UN's human rights efforts but also about what direction it should take Inevitable instances of politicization and the hostile or at best ambivalent attitude of most governments has at times endangered the fragile progress made on the more technical fronts At the same time technical efforts cannot dispense with the complex politics of actualizing the promise of human rights at and through

the UN In addition to significant actual and potential problems of duplication overlapping and inconsistent approaches there are major problems of under funding and insufficient expertise The complexity of these arrangements and the difficulty in evaluating their impact makes a comprehensive guide of the type provided here all the more indispensable These essays critically examine the functions procedures and performance of each of the major UN organs dealing with human rights including the Security Council and the International Court of Justice as well as the more specialized bodies monitoring the implementation of human rights treaties Significant attention is devoted to the considerable efforts at reforming the UN s human rights machinery as illustrated most notably by the creation of the Human Rights Council to replace the Commission on Human Rights The book also looks at the relationship between the various bodies and the potential for major reforms and restructuring

The Many Constitutions of Europe Suvi Sankari, 2016-03-03 This volume makes a contribution to the ongoing lively discussion on European constitutionalism by offering a new perspective and a new interpretation of European constitutional plurality The book combines diverse disciplinary approaches to the constitutional debate It brings together complementing contributions from scholars of European politics economics and sociology as well as established scholars from various fields of law Moreover it provides analytical clarity to the discussion and combines theory with more practical and critical approaches that make use of the constitutional toolbox in analysing the tensions between the different constitutions The collection is a valuable point of reference not only for scholars interested in European studies but also for graduate and post graduate students

The UN Secretary-General and Moral Authority Kent J. Kille, 2007-10-29 Once described by Trygve Lie as the most impossible job on earth the position of UN Secretary General is as frustratingly constrained as it is prestigious The Secretary General s ability to influence global affairs often depends on how the international community regards his moral authority In relation to such moral authority past office holders have drawn on their own ethics and religious backgrounds as diverse as Lutheranism Catholicism Buddhism and Coptic Christianity to guide the role that they played in addressing the UN s goals in the international arena such as the maintenance of international peace and security and the promotion of human rights In *The UN Secretary General and Moral Authority* contributors provide case studies of all seven former secretaries general establishing a much needed comparative survey of each office holder s personal religious and moral values From Trygve Lie s forbearance during the UN s turbulent formative years to the Nobel committee s awarding Kofi Annan and the United Nations the prize for peace in 2001 the case studies all follow the same format first detailing the environmental and experiential factors that forged these men s ethical frameworks then analyzing how their inner code engaged with the duties of office and the global events particular to their terms Balanced and unbiased in its approach this study provides valuable insight into how religious and moral leadership functions in the realm of international relations and how the promotion of ethical values works to diffuse international tensions and improve the quality of human life around the world
