The Quest for Eternity Sarah Kim, 2023-07-31

In our lives, there will be a day when time stops, then eternity will begin. But if we wait until that moment to find out where we are going and how to get there, then it is already too late. That means it isn't too early to learn about these things today. But who can tell us about eternity? Who is better able to tell us about eternity than God, the one who created time and eternity? And He has told us by a secret call from above, a clear perception of truth, an eternity in the hearts of men, and the clear statements of the Creator.

Alexandr I. Solzhenitsyn (1918–2008) was a Russian writer who won the Nobel Prize in Literature for his work, which shook the hearts of humanity. He had a very strong faith in God. Much of his life was associated with death. His father died before Solzhenitsyn was born. While serving in World War II, Solzhenitsyn witnessed the death of most of his teammates. In 1944, one

year before World War II ended his mother died When exiled by Stalin to the Gulags he witnessed the deaths of most fellow prisoners One day when the press asked him if he was afraid of death Solzhenitsyn shared that when he was growing up he was often obsessed with death and feared that he might die before completing his dream of writing literature But after the age of thirty he began to realize that death is not the end of a life but is only a natural milestone that divides two worlds the world in which we now live and the world we will go to From then on he felt his heart always at peace when he thought about death Death is only a natural milestone And as it is appointed to men once to die but after this the judgment Hebrews 9 27 Death is something no one can avoid but death is not the end The problem is that after dying where shall we go And go by which way This book is intended to answer those questions along with many other important questions that have tormented many people s minds as well as the author s minds for a long time

The Egypt Code Robert Bauval,2007-10-01 Why did the ancients align their monuments so precisely with the stars What were the practical and symbolic reasons behind these mysterious configurations From the author of The Orion Mystery the best selling book that introduced the revolutionary star correlation theory about the Giza pyramids The Egypt Code reveals an amazing Grand Unified Plan behind the legendary temples of upper Egypt Robert Bauval one of the world s most prominent and controversial Egyptologists completes his groundbreaking investigation of astronomy as related to Egyptian monuments and related religious texts The Egypt Code revisits the Pyramid Age and the Old Kingdom proposing a vast sky ground correlation for the Memphite Heliopolis region and presenting the possibility of a grand plan spanning three thousand years of Pharaonic civilization and involving pyramids and major temple sites along the Nile The central idea of the book is that the cosmic order which the ancients referred to as Maat was comprised of the observable cycles of the sun and stars in particular the star Sirius and that the changes that took place due to the precession of the equinoxes and the so called Sothic Cycle are reflected in the orientation and location of religious sites
