Communication Too many today are borrowing uncritically from the world of secular marketing and seem to be blithely unaware that the gospel is not a consumer product to be sold persuasively to a waiting world There is a great temptation to be so focused on felt needs that the gospel ceases being the narrow way and becomes instead a broad way to human fulfillment Unless real caution is exercised masses are attracted and churches become filled with those to whom Christianity is only a veneer over an otherwise secular life S gaard succeeds in driving home the sometimes forgotten point that strategies no matter how skillfully they are conceived are des tined to failure unless it is fully recognized that the Holy Spirit is the ultimate persuader There is in short a mysterious interworking between strategies and the ministry of the Holy Spirit An imbalance on either side of this equation is untenable The majority of the chapters offer practical insights into how such media as audio cassettes radio film and television can if properly used play an important role in conversion and spiritual growth But the author never loses sight of the fact that the single most important medium is face to face communication in the context of the local Christian fellowship      **The Philosophy of Trust** Paul Faulkner,Thomas Simpson,2017-02-23 Trust

is central to our social lives We know by trusting what others tell us We act on that basis and on the basis of trust in their promises and implicit commitments So trust underpins both epistemic and practical cooperation and is key to philosophical debates on the conditions of its possibility It is difficult to overstate the significance of these issues On the practical side discussions of cooperation address what makes society possible of how it is that life is not a Hobbesian war of all against all On the epistemic side discussions of cooperation address what makes the pooling of knowledge possible and so the edifice that is science But trust is not merely central to our lives instrumentally trusting relations are themselves of great value and in trusting others we realise distinctive forms of value What are these forms of value and how is trust central to our lives These questions are explored and developed in this volume which collects fifteen new essays on the philosophy of trust They develop and extend existing philosophical discussion of trust and will provide a reference point for future work on trust

*The Nature and Practice of Trust* Marc A. Cohen,2023-01-30 Across the social sciences and even in philosophy trust is most often characterized in terms of expectations and probabilities This book defends an alternative conception of trust as a

moral phenomenon When one person trusts another to do something the first relies on the second's commitment's So trust reflects and is a product of agreement about the commitments and obligations that bind persons who live and work together These commitments and obligations can be implicit but building or rebuilding trust often requires making these commitments and obligations explicit defining the terms of cooperation Part 1 argues that this account of trust better captures our actual trust practices and it draws out connections with both the philosophy and the social science literatures It also describes the process of creating trust relationships with reference to trust invitations Part 2 addresses practical applications of the account defended here in the context of social relationships economic systems and within business organizations These applications emphasize the material benefits of trust but separate from those Part 2 argues that trust is an intrinsic good so we have moral reason to trust The Nature and Practice of Trust will appeal to scholars and advanced students working in ethics social and political philosophy and the social sciences Chapter 6 of this book is available for free in PDF format as Open Access from the individual product page at [www.routledge.com](http://www.routledge.com) It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

**Advances in the Sociology of Trust and Cooperation** Vincent Buskens, Rense Corten, Chris Snijders, 2020-10-26 The problem of cooperation is one of the core issues in sociology and social science more in general The key question is how humans groups organizations institutions and countries can avoid or overcome the collective good dilemmas that could lead to a Hobbesian war of all against all The chapters in this book provide state of the art examples of research on this crucial topic These include theoretical laboratory and field studies on trust and cooperation thereby approaching the issue in three complementary and synergetic ways The theoretical work covers articles on trust and control reputation formation and paradigmatic articles on the benefits and caveats of abstracting reality into models The laboratory studies test the implications of different models of trust and reputation such as the effects of social and institutional embeddedness and the potentially emerging inequalities this may cause The field studies test these implications in applied settings such as business purchasing and supply informal care and different kinds of collaboration networks This book is exemplary for rigorous social science The focus is on effects of social conditions in particular different forms of social and institutional embeddedness on social outcomes at the macro level Modelling efforts are applied to connect social conditions to social outcomes through micro level behavior in ways that are easily overlooked when argumentation is intuitive and impressionistic The book sets forth a mixed method approach by applying different empirical methods to test hypotheses about similar questions Several contributions re-evaluate the theoretical strengths and weaknesses following from the laboratory and field studies Improving the theory in light of these findings facilitates pushing the boundaries of social science

**Early Modern Bonds of Trust** Alison Findlay, Helen Wilcox, Joseph Sterrett, 2025-04-24 The concepts of trust and risk provide important insights into the social and cultural life of early modern England but remain relatively unexplored in early modern literary studies This collection addresses that gap by exploring a wide range of literary genres

and texts including comic drama lyric verse emblem books ledgers wills polemical prose and religious epic Contributors explore issues of personal trust through the faith and lies that characterize Shakespeare's sonnets Donne's sermons and Milton's Paradise Lost Following the idea of trust and risk into community brings us to a discussion of The Merry Wives of Windsor the spiritual trust of faith communities and the network of relationships that are traceable through surviving records of women's wills Following this progression outwards from the personal to the communal the final essays in the collection consider the role of institutional trust specifically the early modern obsession with credit in its various guises The Merchant of Venice Volpone and The Winter's Tale act as illustrative examples of credit's significance for understanding trust and risk in the early modern period Taken together the range of texts and genres considered reveal new insights into early modern English literature and its socio-economic context

*Discourses of Trust* C. Candlin, Jonathan Crichton, 2019-08-29 The first book to bring together researchers and practitioners from a range of professions and institutions in exploring how people develop and may lose Trust through the ways in which they speak write and act Includes practical examples of how to conduct Trust related research using tools from applied linguistics and

discourse analysis      **Violations of Trust** Richard Hil, 2017-05-15 The past few decades have brought to light increasing evidence of systemic and repeated institutional abuse of children and young people in many western nations Government enquiries research studies and media reports have begun to highlight the widespread nature of sexual physical and emotional abuse of vulnerable children and young people However while public attention has focused on episodic dramatic representations of institutional abuse comparatively little emphasis has been given to the more mundane routinized and systemic nature of abuse that has occurred This book documents comprehensively a full range of abuse occurring in caring and protective institutions with particular reference to the Australian case The dominant theme is betrayal and in particular the ways in which agencies charged with the care and protection of children and young people become the sites of abusive practices The authors draw on a range of theoretical frameworks to explore issues of trust and betrayal in the context of the professional and ethical obligations which workers have to those in their charge The authors argue that it is not sufficient merely to report on accounts of institutional abuse or the consequences of particular practices rather it is necessary to locate the prevalence of institutional abuse in the wider context of institutional practices as they relate to the governance of particular sections of the population      *Perspectives on Trust in the History of Philosophy* David J. Collins, Iris Vidmar Jovanovic, Mark Alfano, 2023-11-20 What is the importance of trust for human social life What role does trust play in morality in political arrangements and in our attempts to gain knowledge and understand the world When should we trust others and when is withholding trust or mistrusting others warranted While philosophers have recently turned their attention to such questions they have generally overlooked what important thinkers throughout the history of philosophy have said on the topic of trust Edited by David Collins Iris Vidmar Jovanovic and Mark Alfano *Perspectives on Trust in the History of Philosophy* brings together examinations of the views on trust that can be found in several major philosophers from the ancient world up to the twentieth century and from across the globe With a focus on the moral and social dimensions of trust this collection includes perspectives from Chinese Indian and African philosophies and the contributors examine how thinkers such as Confucius Aristotle Hobbes Hume Smith Kant Nietzsche L gstrup and Murdoch have thought about trust and trustworthiness This book demonstrates that good philosophical work on trust must be historically informed      **Breach of Trust** Peter Birks, Arianna Pretto-Sakmann, Arianna Pretto, 2002-07-05 Recent leading cases have demonstrated the urgent need to modernize the learning on breach of trust which has lagged behind the flourishing scholarship on the creation of trusts Since breach of trust or fiduciary duty occupies the centre of the legal stage it comes as a surprise that although one or two novelists have chosen *Breach of Trust* as the title to their book no lawyer has so far thought it necessary to produce a specialized work on the subject To fill the gap this book written by a team of leading trust lawyers from a number of common law jurisdictions investigates all the principal aspects of the subject The nature of the trustee's duties and of the liability for breach is closely examined and all available defences and excuses are reviewed Two substantial chapters consider the

consequences of assisting a breach or receiving trust property from a trustee acting in breach The book closes with a critical overview of the entire topic CONTENTS 1 Robert Chambers Liability for Breach 2 Joshua Getzler The Duty of Care 3 Edwin Simpson The Conflict of Interest 4 David Fox Overreaching 5 Lionel Smith Property Transferred in Breach 6 Charles Mitchell Assistance 7 Peter Birks Receipt 8 James Penner Exemption clauses 9 John Lowry and Rod Edmunds Honest and Reasonable Breach 10 Jennifer Payne Consent 11 William Swadling Limitation 12 Gary Watt Laches Estoppel and Election 13 David Hayton An Overview
