introduction to the field      Practical Research Methods for Media and Cultural Studies Máire Messenger Davies, Nick Mosdell, 2006 Many very intelligent people don't like dealing with numbers Similarly many gifted scientists are not especially interested in studying people and their cultural behavior In this book we argue that being interested in people and their cultures and helping students and others to use numbers to pursue these interests are not mutually exclusive Research methods are becoming an increasingly important requirement for students of all kinds But many students particularly those in the humanities struggle with concepts drawn from the social sciences and find quantitative and statistical information inaccessible and daunting Nonetheless such concepts are found in nearly all areas of society from market research to opinion polls to psychological studies of human behavior This book provides a simple guide to the process of conducting research in the humanities with special reference to media and culture from the planning stage through the data gathering to the analysis and interpretation of results planning it doing it and understanding it The book shows how students own choice of research topic can be refined into a manageable research question and how the most appropriate methodologies can be applied Each section draws on actual examples from research that the authors and their students have conducted Topics covered include choosing a research question and method instrument design and pilot data practical procedures research with children looking at statistics and interpretation of results      Better Stories: Mapping Cultural Studies with Lawrence Grossberg Andrew Davis, John Nguyet Erni, Carolyn Hardin, Gilbert B. Momper, 2010-04-29 This pocket guide offers researchers a framework for conducting research in a culturally sensitive manner with individuals families and communities in diverse settings This unique framework focuses on a process rather than a typology of behaviors attitudes values and beliefs All too frequently cross cultural research improperly attributes behaviors beliefs and values entirely to culture when a closer examination would reveal the shared influences of gender socioeconomic status immigration status and racial and ethnic backgrounds that interact in complex ways By encouraging practitioners to incorporate an intersectionality lens into their work this pocket guide helps researchers reveal stories that are more than the sum of particular identities Sharing their extensive research experience with diverse populations around the world the authors present a range of fluid and dynamic cross cultural research practices that readers can easily adapt to their unique circumstances At the intersection of culture and research methods chapters illustrate the application of the model to three broad areas of inquiry describing the nature of a problem understanding the etiology of the problem and evaluating the interventions designed to ameliorate the problem Each area is illustrated with examples of research projects that incorporate multiple epistemologies and methodologies in order to better

understand and respond to a population's needs This guide offers a complete roadmap for developing cross cultural projects that truly engage communities and will be a trusted resource for students and seasoned researchers alike
