Questions de sociologie Pierre Bourdieu, 2016-02-25T00:00:00+01:00 Ce qui circule entre les chercheurs et les non spécialistes ou même entre une science et les spécialistes des autres sciences ce sont au mieux les résultats mais jamais les opérations On n'entre jamais dans les cuisines de la science Ce sont ces secrets de maître ces recettes de fabrication ces tours de main que Pierre Bourdieu tente de livrer ici En regroupant l'ensemble des réponses qu'il a faites dans des exposés des interventions orales ou des interviews aux principales questions que pose la sociologie il livre sous la forme la fois directe et nuancée que permet le discours oral des réflexions sur la méthode et sur les concepts fondamentaux de sa sociologie champ habitus capital investissement etc sur les problèmes pistologiques et philosophiques que pose la science sociale en même temps que des analyses nouvelles sur la culture et la politique la grève et le syndicalisme le sport et la littérature la mode et la vie artistique le langage et la musique En donnant accès au travail sociologique en train de se faire il invite le lecteur non seulement à identifier une pensée toute pensée mais se rendre maître d'une méthode de pensée Ce recueil est initialement paru en 1981

Les grandes questions sociales contemporaines Bertrand Affilé, Christian Gentil, Franck Rimbart, 2007 Chacune des 70 fiches présente sur une double page explore une problématique Des tableaux et des graphiques complètent ces mini exposés Des repères bibliographiques permettent d'approfondir les questions abordées

The Work Of Pierre Bourdieu Derek Robbins, 2020-02-04 This book seeks to offer a chronological account of the development of Pierre Bourdieu's thinking It is intended to guide readers towards and through the original texts and attempts to represent the French meaning of Bourdieu hence the concentration on the French chronology

In Other Words Pierre Bourdieu, 1990 Pierre Bourdieu is one of the most protean intellectual forces in contemporary French thought He holds the chair in sociology at the prestigious Collège de France yet his influence extends far beyond the area of sociological research and theory Bourdieu's work presented in over twenty books lies on the borders of philosophy anthropology and ethnology and cultural theory The present volume consists of diverse individual texts produced between 1980 and 1986 which take two forms interviews in which Bourdieu confronts a series of probing and intelligent interviewers and conference papers that clarify and extend specific areas of his current research Now that Bourdieu's work has achieved wide diffusion and celebrity this is an appropriate time for this volume a pause for retrospection and resynthesis for correction of misreadings and extension of previous insights and for projection of the next stages of his work For this English edition Bourdieu's celebrated inaugural lecture at the Collège de France Leçon sur la Leçon has been added Because of the verve and clarity of Bourdieu's arguments in this book it is a very readable and concise introduction to his work

50 questions de sociologie, 2020-10-07

Questions on Social Explanation Luigia Camaioni, Cláudia De Lemos, 1985-01-01 The various contributions to this volume converge on two themes First the explanatory role of social interaction which for a long time has been a

source of criticism of Piaget's view of intelligence is dealt with not only in relation to cognitive development but also to language acquisition and to education. The second point of thematic convergence is the compatibility of genetic epistemology and psychoanalytic theory in view of the establishment of relationships between emotional and cognitive development.

Sociologie Ernest Roguin, 1929 Producing and living the high-rise: New contexts, old questions? Manoel Rodrigues Alves, Manuel Appert, Christian Montès, 2024-05-14

The purpose of the book is to assess the process of urban verticalization in different contexts through time to provide insight into the relationships between highrise design and the way inhabitants negotiate them in their everyday lives to assess how planners politicians and designers negotiate residential highrises in the strategies they develop for building the city and to introduce urban narratives and cartographies. Verticalization although not new currently takes place in a very different context than post 1945. Today highrise residential buildings are more than architectural solutions they are commodities in a global market where capital flows are fixed by developers and municipalities. Our exploration of residential verticalization is anchored in case studies revealing different types of local global negotiations in the design of the city and has been framed by three interrelated dynamics: first the complex relationships within the financialization of real estate markets revealing differences in the types of local global negotiations in the construction of the neo liberal city; secondly the most developed anchors residential verticalization in the processes of socio spatial differentiation within cities mostly identified as gentrification associated to processes of urban renewal and densification; the third related to readings and interpretations of the urban landscape and social spatial practices and its iconographic and cartographic representations. This book is of interest to academics students planners architects and urban studies professionals. It shows that the chosen research object is an increasingly relevant angle of analysis of the contemporary city. It also provides a better knowledge of the processes of residential verticalization their impact on the privatization of the urban space and on urban segregation or fragmentation.
