## ¿Qué es el cáncer? Eduardo

López-Collazo, 2020-04-24 Algún día dejaremos de hablar del cáncer o a lo mejor no le tendremos miedo Pasar como con la sfilis la polio y otras tantas dolencias que huelen a pasado y se eliminan de un plumazo es decir con una vacuna o un antibiótico Sin embargo para que ese día llegue todos tenemos que hacer algo La única manera de combatir un mal es conocerlo Ese es el propósito del libro que tienes en tus manos Estas páginas te ayudarán a entender qué es el cáncer por qué ocurre qué hacemos para curarlo cómo podemos prevenirlo cuál es su futuro Sin palabras incomprensibles ni términos futuristas Si te dejas llevar acabarás dominando los conceptos necesarios para comprender lo que ocurre El saber no ocupa lugar y al enemigo se le domina cuando lo conocemos Preparados

*Comprender el cáncer* María I. importance of stress in the development of heart disease is well established but its role in cancer is only just beginning to be investigated Recent research in humans indicates that various life events personality pre dispositions as well as immunological and central nervous system interactions may trigger the cancer process or at the very least accentuate its development In this book a number of recognized international authorities provide state of the art statements on the key issues of the subject Beginning with a review of the findings to date there follows more in depth analysis of potential social psychological precursors to cancer and the way in which they may influence the aetiology and development of the disease The final section deals with the way in which psychosocial factors may be managed in cancer patients and provides a comparative summary of the various methodological approaches utilized in studies exploring the field of psychological oncology The book will provide a unique digest of current knowledge as well as a starting point for future research and will be invaluable to all concerned with the study and management of the cancer process Other Wiley titles on this subject include Stress Research Issues for the Eighties Edited by Cary L Cooper 160 pages February 1983 Mind and Cancer Prognosis Basil A Stoll St Thomas s Hospital and Royal Free Hospital London 214 pages December 1979 All about Cancer Chris Williams CRC Medical Oncology Unit University of Southampton 404 pages April 1983

Z. Martin, 2014-11-22 Pocas personas fuera de la comunidad de pacientes y profesionales de la salud conocen el término tumorigenesis la tendencia del código genético en las células de corromperse y transformar tejidos aparentemente sanos en tumores Los crecimientos anormales solo son poco frecuentes en 1900 uno en ocho mil pero en años venideros la mitad de los hombres en EEUU y un tercio de las mujeres contraerán algún tipo de cáncer El pronóstico para otros países desarrollados o no es prácticamente idéntico Las autoridades y la ortodoxia médica callan para evitar que cunda el pánico pero ya no es necesario continuar callando porque la ciencia ha descubierto cómo funciona nuestro sistema inmunitario para protegernos del crecimiento incontrolado de un cáncer Además hay nuevos tratamientos y la nutrición ofrece alternativas que pueden matar el cáncer sin ocasionarle la muerte al paciente Un investigador define el cáncer como una enfermedad metabólica La Sociedad Americana contra el Cáncer señala que muchos tipos de cánceres pueden evitarse La prevención no es tan simple como una vacuna ni se relaciona con la detección temprana pero es posible practicando lo que algunos denominan inmunoterapia oncológica La autora de este opusculo cuyo aporte anterior fue en el campo de la literatura la docencia y la investigación reconoce que tiene una deuda contrada con la tecnología sin la cual no habría recopilado esta información que dependiendo de su utilidad los amables lectores pueden aprovechar para colmar sus botiquines y canastas alimentarias con nuevas opciones terapéuticas Cancer.
