Joseph Butler Daisuke Arie, Masatake Okubo, Naoki Yajima, 2024-03-23 This book is the first English language monograph about Bishop Joseph Butler 1692 1752 by Japanese scholars It is an especially interesting and controversial message coming as it does from Japan a well developed secular economic state where less than 1% of the population are Christians and opposing the recent trend of curtailing the eighteenth century political economy into religiosity and theology This multidisciplinary edited book presents a different and new perspective from the recent work of Oslington et al which seeks to reduce the political economy of eighteenth and nineteenth century Britain to religiosity and theology triggered by the writings of A M C Waterman Unlike those works the present one aims to re-examine the largely forgotten Butler who was said in the nineteenth century to be the most influential cleric and preacher in the Church of England of the previous century not just as a clerical ideologue but mainly as a proto political economist before Adam Smith In order to achieve this goal first the authors clarify that Butler's theory of conscience and probability which began with passion and selfishness was created with the development of eighteenth century commercial society in mind Second the manner in which Butler's discourse was directed not at anti Anglicans or eminent intellectuals but at the majority of ordinary secular society is explored How it was consistent with and defended their sentiments and economic behavior not only in Analogy but mainly in Fifteen Sermons is also investigated and explained Finally readers see that Butler's antirational grasp of humanity and empiricist epistemology based on probability presented in these inquiries can in fact be considered a pioneering expression of the methodological premises of modern economics **Pr Joseph MBOUI Par lui-même** Pascal Touoyem, 2025-01-26 This book illustrated by
