Office of Education, Wilhelmina Hill, Helen Katherine Mackintosh, Lloyd M. Dunn, 1954 The Semantics of Derivational Morphology Sven Kotowski, Ingo Plag, 2023-02-20 This volume brings together cutting edge research on the semantic properties of derived words and the processes by which these words are derived To this day many of these processes remain under researched and the nature of meaning in derivational morphology remains ill understood All eight articles have an empirical focus and rely on carefully collected sets of data At the same time the contributions represent a broad variety of approaches Several contributions deal with specific problems of the pairing of form and meaning such as the rivalry between nominalizing suffixes or the semantic categories encoded by conversion pairs Other articles tackle the more general question of how meaning is organized e.g. whether there is evidence for the paradigmatic organization of derived words or the reality of the inflection derivation dichotomy The contributions feature innovative methodologies such as representing lexical meaning as word distribution or predicting semantic properties by means of analogical algorithms This volume offers new and highly interesting insights into how complex words mean and offers directions for future research in an oft neglected field Whole Novels for the Whole Class Ariel Sacks, 2013-10-21 Work with students at all levels to help them read novels Whole Novels is a practical field tested guide to implementing a student centered literature program that promotes critical thinking and literary understanding through the study of novels with middle school students Rather than
