Lazaridis, 2014-10-01 International Advances in Education Global Initiatives for Equity and Social Justice is an international research monograph series of scholarly works that primarily focus on empowering students children adolescents and young adults from diverse current circumstances and historic beliefs and traditions to become non exploited non exploitive contributing members of the 21st century The series draws on the research and innovative practices of investigators academics and community organizers around the globe that have contributed to the evidence base for developing sound educational policies practices and programs that optimize all students potential Each volume includes multidisciplinary theory research and practices that provide an enriched understanding of the drivers of human potential via education to assist others in exploring adapting and replicating innovative strategies that enable ALL students to realize their full potential Chapters in this volume are drawn from a wide range of countries including Australia Brazil Canada China Finland Georgia Haiti India Italy Kyrgyzstan Portugal Slovenia Tanzania Ukraine and The United States all addressing issues of educational inequity economic constraint class bias and the links between education poverty and social status The individual chapters provide examples of theory research and practice that collectively present a lively informative cross perspective international conversation highlighting the significant gross economic and social injustices that abound in a wide variety of educational contexts around the world while spotlighting important inspirational and innovative remedies Taken together the chapters advance our understanding of best practices in the education of economically disadvantaged and socially marginalized populations while collectively rejecting institutional policies and traditional practices that reinforce the roots of economic and social discrimination Chapter authors utilize a range of methodologies including empirical research historical reviews case studies and personal reflections to demonstrate that poverty and class status are sociopolitical conditions rather than individual identities In addition that education is an absolute human right and a powerful mechanism to promote individual national and international upward social and economic mobility national stability and citizen wellbeing The Institutions of Education William K. Cummings, 2003-01-01 At many times in educational history including the past decade there are reports of crisis and cries for reform The successes of foreign competitors are pointed to new moneys are sought and laws passed Occasionally these reform efforts make a difference Just as often they end up as mere rhetoric and the

educational indicators continue to slide Education is a dynamic sector with its ups and downs To understand these ups and downs and to gain a clearer grasp of the essentials of reform we need to look deeply into the origins and development of successful and failed reforms This book seeks to answer that need To do so it stresses two important themes First the essence of educational practice lies in the institutionalised ideals and norms of an educational system not in how much is spent on education or how many people are involved in education Second while many contemporary observers of education tend to think that sound educational practice is pretty much the same around the world this book argues that these are at least six distinctive educational InstitutionS currently in place in the modern world each with its unique strengths and weaknesses Each also has its own cycle of reform and renewal So the landscape of educational reform is much broader than most observers acknowledge The book is unique in highlighting the principle characteristics of Japanese education alongside those of Soviet Russia and the core educational systems of Western Europe and North America While the account focuses on national differences the analysis actually begins from the ground up looking at particular schools that emerged early in the six modernising experiences These early schools are described here as representative schools for the practices they initiated have had a profound influence on the direction of subsequent reforms in their respective national settings Social Justice and Third World Education Timothy J. Scrase,2021-12-12 First Published in 1997 In much of the comparative education literature questions of educational inequality and lack of educational opportunity in the developing world stand as perplexing complex and difficult problems Yet while inequality in education remains one of the most researched and written about topics in the discipline the question of social justice and its relationship to education remains implicit This volume aims to reverse this trend to make the issue of social justice both in theory and practice central and explicit **Development Education in Japan** Yuri Ishii,2003-05-09 This book aims to provide an explanation for the slow introduction of Development Education in Japan **Women, Education, and Development in Asia** Grace C.L. Mak,2013-11-26 This volume of twelve original essays examines the interplay between women s education and development and if and how it has changed women s status in selected nations in Asia Educational expansion in recent decades have benefitted women in Asia at least in quantitative terms Industrialization has also created room for increased waged employment for them However the relative openness of these systems has not been paralleled at the cultural level Women in Asia which remains largely patriarchal are thus caught in contradictions This volume examines how women use and compromise with opportunities and limits in education the role of education in their economic participation and the enhancement and tension brought to their family roles The volume is edited from a cross national perspective The chapters each covering a nation rest on a common framework Each begins with a brief historical account of education fore women It then investigates the extent women have been able to take advantage of them What follows is an analysis of how women use their education in the labor market and in the family Society s definition of women s roles in the family often acts to reduce the effect of schooling on women s economic participation This interplay is

further complicated by such factors as social class and or caste religion and ethnicity
