*Russian Constructivism & I*ААkov Chernikhov Catherine Cooke,1989 Special Relationships in World Politics Kristin Haugevik,2018-09-03 Claims of inter state specialness are commonplace in international politics But how do some relationships between states come to be seen and categorized as special in the first place And what impact if any do recurring public representations of specialness have on states political and diplomatic interaction While much scholarly work exists on alleged instances of special relationships and on inter state cooperation and alliances more generally little systematic and theory informed research has been conducted on how special relationships evolve and unfold in practice This book offers such a comprehensive study Theorizing inter state relations as ongoing social processes it makes the case for approaching special relationships as constituted and upheld through linguistic representations and bilateral interaction practices Haugevik explores this claim through an in depth study of how the bilateral relationship most frequently referred to as special the US British has unfolded over the last seventy years This analysis is complemented with a study of Britain s relationship with a more junior partner Norway during the same period The book offers an original take on inter state relations and diplomacy during the Cold War and after and develops an analytical framework for understanding why some state relationships maintain their status as special while others end up as benignly neglected ones

**Digital Monuments** Simone Brott,2019-09-18 Digital Monuments radically explodes iconic architecture of the new millennium and its hijacking of the public imagination via the digital image Hallucinatory constructions such as Rem Koolhaas s CCTV headquarters in Beijing Frank Gehry s Guggenheim Museum in Bilbao and Zaha Hadid s Performing Arts Centre in Abu Dhabi are all introduced to the world by immortal digital imagery that floods the internet yet comes to haunt the actualised buildings Like holograms these digital monuments which violently push physics and engineering to their limits flicker eerily between the

real and the unreal invoking fantasies of omnipotence immortality and utopian cities But this experience of iconic architecture as a digital dream on the ground conceals from the urban spectator the social reality of the buildings and the rigidity of their ideology In 18 micro essays Digital Monuments exposes the stereotypes of iconic architecture while depicting the savagery of the industry from the Greek and Spanish crises triggered by financialised iconic development to mass labour deaths on construction sites in the UAE
