Sculpture of Northern Thailand Carol Stratton, 2004 **The Great Indian Phone Book** Assa Doron, Robin Jeffrey, 2013-04-02 In 2001 India had 4 million cell phone subscribers Ten years later that number had exploded to more than 750 million Over just a decade the mobile phone was transformed from a rare and unwieldy instrument to a palm sized affordable staple taken for granted by poor fishermen in Kerala and affluent entrepreneurs in Mumbai alike The Great Indian Phone Book investigates the social revolution ignited by what may be the most significant communications device in history one which has disrupted more people and relationships than the printing press wristwatch automobile or railways though it has qualities of all four In this fast paced study Assa Doron and Robin Jeffrey explore the whole ecosystem of the cheap mobile phone Blending journalistic immediacy with years of field research experience in India they portray the capitalists and bureaucrats who control the cellular infrastructure and wrestle over bandwidth rights the marketers and technicians who

bring mobile phones to the masses and the often poor village bound users who adapt these addictive and sometimes troublesome devices to their daily lives Examining the challenges cell phones pose to a hierarchy bound country the authors argue that in India where caste and gender restrictions have defined power for generations the disruptive potential of mobile phones is even greater than elsewhere The Great Indian Phone Book is a rigorously researched multidimensional tale of what can happen when a powerful and readily available technology is placed in the hands of a large still predominantly poor population The Oxford Handbook of Religion and Violence Mark Juergensmeyer, Margo Kitts, Michael K. Jerryson, 2015-11

Violence has always played a part in the religious imagination from symbols and myths to legendary battles from colossal wars to the theater of terrorism The Oxford Handbook of Religion and Violence surveys intersections between religion and violence throughout history and around the world The forty original essays in this volume include overviews of major religious traditions showing how violence is justified within the literary and theological foundations of the tradition how it is used symbolically and in ritual practice and how social acts of violence and warfare have been justified by religious ideas The essays also examine patterns and themes relating to religious violence such as sacrifice and martyrdom which are explored in cross disciplinary or regional analyses and offer major analytic approaches from literary to social scientific studies The contributors to this volume innovative thinkers who are forging new directions in theory and analysis related to religion and violence provide novel insights into this important field of studies By mapping out the whole field of religion and violence The Oxford Handbook of Religion and Violence will prove an authoritative source for students and scholars for years to come

ABIA: South and Southeast Asian Art and Archaeology Index Sita Pieris, Ellen Raven, 2010-11-19 Volume Three offers 1643 annotated records on publications regarding the art and archaeology of South Asia Central Asia and Tibet selected from the ABIA Index database at www.abia.net which were published between 2002 and 2007 *The Lives of Chinese Objects* Louise Tythacott, 2011-06-01 This is the biography of a set of rare Buddhist statues from China Their extraordinary adventures take them from the Buddhist temples of fifteenth century Putuo China's most important pilgrimage island to their seizure by a British soldier in the First Opium War in the early 1840s and on to a starring role in the Great Exhibition of 1851 In the 1850s they moved in and out of dealers and antiquarian collections arriving in 1867 at Liverpool Museum Here they were re conceptualized as specimens of the Mongolian race and later as examples of Oriental art The statues escaped the bombing of the Museum during the Second World War and lived out their existence for the next sixty years dismembered corroding and neglected in the stores their histories lost and origins unknown As the curator of Asian collections at Liverpool Museum the author became fascinated by these bronzes and selected them for display in the Buddhism section of the World Cultures gallery In 2005 quite by chance the discovery of a lithograph of the figures on prominent display in the Great Exhibition enabled the remarkable lives of these statues to be reconstructed *Culture and Customs of Thailand* Arne Kislenko, 2004-05-30 Thailand is rapidly industrializing dramatically improving the living standards of its people and

gradually developing a more democratic society Despite such profound changes traditional Thai culture has not only survived but has also in many respects prospered Although famous for its food and despite its increasing popularity as a tourist destination Thailand remains relatively unknown to most Westerners Culture and Customs of Thailand presents the traditional culture and customs against the backdrop of modern times Thailand has always been an important Southeast Asian country With a long reigning monarchy it is the only country in the region that has never been colonized by a Western power or suffered bloody revolutions and wars It was the first Asian country to establish diplomatic relations with the United States and has remained a constant ally Thailand has emerged as a considerable economic force as the world's largest rice and rubber producer and remains a regional political power Against this historical framework Kislenko deftly introduces the traditional and modern strands of the dominant Buddhist faith and other religions such as animism Coverage includes literature the arts architecture including the Thai Wat food and dress gender and marriage festivals and fun and social customs Kislenko also balances the portrait with discussions of threats from globalization AIDS and sex tourism the drug trade and corruption in business and government Evocative photos a country map a timeline and a chronology complete the coverage This reference is the best source for students and general readers to gain substantial sweeping insight into the Thais and their land of smiles *First-time Asia* Lesley Reader, Lucy Ridout, 2003 A book to read when considering a first visit to Asia covering more than twenty first time destinations each profile covering the country's main highlights as well as its more unusual attractions Suggested itineraries online resources embassy and tourist information are included together with the practicalities of life on the road The final chapter Basics covers contact addresses and websites for everything from backpack suppliers to travel health clinics *Missionary Tropics* Ines G. Županov, 2005 A provocative contribution to the history of early modern Euro Asian interactions that provides new perspectives on the encounter between Catholicism and Hinduism in India **Counterheritage** Denis Byrne, 2014-04-16 The claim that heritage practice in Asia is Eurocentric may be well founded but the view that local people in Asia need to be educated by heritage practitioners and governments to properly conserve their heritage distracts from the responsibility of educating oneself about the local popular beliefs and practices which constitute the bedrock of most people's engagement with the material past Written by an archaeologist who has long had one foot in the field of heritage practice and another in the academic camp of archaeology and heritage studies Counterheritage is at once a forthright critique of current heritage practice in the Asian arena and a contribution to this project of self education Popular religion in Asia including popular Buddhism and Islam folk Catholicism and Chinese deity cults has a constituency that accounts for a majority of Asia's population making its exclusion from heritage processes an issue of social justice but more pragmatically it explains why many heritage conservation programs fail to gain local traction This book describes how the tenets of popular religion affect building and renovation practices and describes how modernist attempts to suppress popular religion in Asia in the early and mid twentieth century impacted religious heritage Author Denis

Byrne argues that the campaign by archaeologists and heritage professionals against the private collecting and looting of antiquities in Asia largely ignores the regimes of value which heritage discourse has helped erect and into which collectors and local diggers play. Focussing on the Philippines, Thailand and Taiwan but also referencing China and other parts of Southeast Asia, richly detailed portraits are provided of the way people live with old things and are affected by them. Narratives of the author's fieldwork are woven into arguments built upon an extensive and penetrating reading of the historical and anthropological literature. The critical stance embodied in the title *Counterheritage* is balanced by the optimism of the book's vision of a different practice of heritage, advocating a view of heritage objects as vibrant agentic things enfolded in social practice rather than as inert and passive surfaces subject to conservation.
