Theory , Perspectives on the Ideas of Gregory Bateson, Ecological Intelligence, and Educational Reforms C. A. Bowers, 2011 It is widely acknowledged that Gregory Bateson's ideas have been influential in a number of fields Unfortunately the importance of his ideas for understanding why public schools and universities continue to perpetuate ecologically unsustainable ways of thinking has not been adequately recognized Given the deepening ecological and economic crises this book is particularly timely as it clarifies how Bateson's five key ideas when taken as a whole provides the conceptual framework for introducing educational reforms that address both problems That is he explains why educators unconsciously continue to perpetuate the deep cultural assumptions that were constituted before there was an awareness of environmental limits and how the emphasis on a possessive form of individualism and endless material progress undermines traditions of self reliance within the world's diversity of communities His contributions to making substantive educational reforms include 1 Rethinking social justice issues in ways that take account of how the ecological crisis impacts the most vulnerable people 2 How to make the transition to exercising ecological intelligence in the areas of democratic decision making and moral values 3 Clarifying how computer mediated learning perpetuates abstract thinking and the deep cultural

assumptions that are at the cultural roots of the ecological and economic crises The chapter on pedagogical and curricular decisions that foster ecological intelligence provides practical suggestions for how public school teachers and university professors can begin to make the transition to an ethnically diverse and ecologically sustainable future Comments about the book We need an ecological consciousness which in Gregory Bateson s words is aware of the patterns that connect Chet Bowers leads us into that unmapped territory with a compass which helps Wes Jackson President The Land Institute author of Consulting the Genius of Place and Rooted in the Land Essays on Community and Place Chet Bowers philosophical reflections on Bateson s thought and its implications for education are thought provoking challenging and very inspiring Fritjof Capra author of The Web of Life and The Hidden Connections Learning is a Verb Sherrie Reynolds,2017-05-12 This book explores a new way of thinking about teaching and learning Its central goal is to help us understand how we think and learn it will also help teachers understand children and offers a new and helpful perspective on the role of teaching The book provides an orientation or way of thinking about the psychological dimensions of teaching and learning This orientation is discussed in relation to cultural shifts that have influenced all fields of study in education and psychology the shift is reflected in the works of such scholars as Piaget Vygotsky Bruner and others Their work marks a change from a mechanical view of learning to a view of learning as dynamic transformation In Learning Is a Verb Sherrie Reynolds discusses how thinking about teaching and learning must change so that we can create conditions that help children think and interact with one another in helpful healthy ways Her engaging conversational style together with many examples and observations will lead readers from reflection on their experiences to a deeper understanding of the changes needed in our educational system

Dove,2021-02-23 A seminal anthropological work on the paradoxical relationship between human consciousness and the environment This book asks an age old question about the relationship between human consciousness and the environment How do we think about our own thoughts and actions How can we transcend the exigencies of daily life How can we achieve sufficient distance from our own everyday realities to think and act more sustainably To address these questions Michael R Dove draws on the results of decades of research in South and Southeast Asia on how local cultures have circumvented the curse of consciousness the paradox that we cannot completely comprehend the ecosystem of which we are part He distills from his ethnographic ecological and historical research three principles perspectivism seeing oneself

from outside oneself metamorphosis becoming something that one is not and mimesis copying something that one is not which help a society to transcend the hubris and myopia of everyday existence and achieve greater insight into its ecosystem
